Marine Diesel Engines May 28 2022 Praise for this boating classic: "The most up-to-date and readable book we've seen on the subject."—Sailing World "Deserves a place on any diesel-powered boat."—Motor Boat & Yachting "Clear, logical, and even interesting to read."—Cruising World Keep your diesel engine going with help from a master mechanic Marine Diesel Engines has been the bible for do-it-yourself boatowners for more than 15 years. Now updated with information on fuel injection systems, electronic engine controls, and other new diesel technologies, Nigel Calder's bestseller has everything you need to keep your diesel engine running cleanly and efficiently. Marine Diesel Engines explains how to: Diagnose and repair engine problems Perform routine and annual maintenance Extend the life and improve the efficiency of your engine

The Complete Book of Classic Ford Tractors Jan 24 2022 The Complete Book of Classic Ford Tractors presents the evolution of the popular machines from 1917 to 1996. Model histories are accompanied by detailed specification charts and, of course, gorgeous photography of restored models.

Railroad Record and Journal of Commerce, Banking, Manufactures and Statistics Jun 16 2021

Small John Deere Tractors Jul 30 2022 During the initial wave of powered farming in the early 20th century, most medium- to large-scale farmers traded in their mules for tractors. In the 1930s, when manufacturers began marketing their wares to the holdouts, they began building smaller, inexpensive tractors designed to do the work of two mules. This color history covers John Deere's entries in the market, namely its extremely popular two-cylinder models: the L, LA, M, MC, 40, 420, 320, 430, and 330. Today, these models are some of the most popular among the old-tractor crowd. New color photography features restored models today and is supplemented by archival images from the early 20th century. Sidebars examine John Deere's competitors in the class.

Vintage Ford Tractors Oct 01 2022 Provides a detailed history of one of the most famous makes of farm tractors, along with fascinating photographs. Covers all American and European models from 1917 on.

Fire Engines Feb 10 2021 More complex and imposing than any other vehicle in the British emergency services, the fire engine has a long and interesting history. The earliest water pumps had been developed by the eighteenth century – basic manual pumps that had to be hauled around by people or horses, and were often

only used on fire-insured premises. In the nineteenth and twentieth centuries horse-drawn, steam-powered fire engines, and eventually motorised fire engines, came to revolutionise firefighting, offering far greater versatility and the brigades came to be run by the municipalities. In this beautifully illustrated introduction, Eddie Baker charts the history of fire engines and their variants, and the increasingly complex equipment they have carried, such as high-rise ladders and high-pressure hoses. He also explains the wider history of the fire service and how the engines have been shaped by its needs and, most importantly, those of the firefighters themselves.

Illustrations: 300+ drawings Pages: 222 pages Published: 2017 Format: softcover Category: Inboards, Gas & Diesel

In Good Faith Oct 21 2021 In retrospect it is difficult to accept that Western democracies have implicitly supported, or at least tolerated, the legalized system of white supremacy in South Africa known as apartheid. Renate Pratt's new book, *In Good Faith*, explains why the Christian churches were among the first to publicly protest, and why they provided such cogent and determined international support for the struggle against apartheid. The Taskforce on the Churches and Corporate Responsibility is a coalition of Christian churches that for nearly twenty years was one of Canada's leading anti-apartheid advocates. As the first co-ordinator of this Taskforce, Renate Pratt was at the centre of the early anti-apartheid initiatives in Canada and consequently is able to supply a clear and accurate view. The book traces the history of exchanges between the Taskforce and successive ministers and senior civil servants of the Department of External Affairs. It details the reluctant and weak responses offered by the Canadian government and business community right up to the time of Nelson Mandela's release from prison. *In Good Faith* will be of particular interest to Canadian Christians concerned with ecumenical co-operation and with the social and political dimensions of their faith. Equally, it will appeal to those interested in the impact of public interest organizations on public policy or the relationship between politics and business interests.
