**Legislating International Organization** Mar 26 2022 In *Legislating International Organization*, Kathryn Lavelle argues against the commonly-held idea that key international organizations are entities unto themselves, immune from the influence and pressures of individual states' domestic policies. Covering the history of the IMF and World Bank from their origins, she shows that domestic political constituencies in advanced industrial states have always been important drivers of international financial institution policy. This book will reshape how we think about how the US Congress interacts with international institutions and more broadly about the relationship of domestic politics to global governance throughout the world.

[Ideology and Identity](#) Jun 04 2020 Indian party politics, commonly viewed as chaotic, clientelistic, and corrupt, is nevertheless a model for deepening democracy and accommodating diversity. Historically, though, observers have argued that Indian politics is non-ideological in nature. In contrast, Pradeep Chhibber and Rahul Verma contend that the Western European paradigm of "ideology" is not applicable to many contemporary multiethnic countries. In these more diverse states, the most important ideological debates center on statism-the extent to which the state should dominate and regulate society-and recognition-whether and how the state should accommodate various marginalized groups and protect minority rights from majorities. Using survey data from the Indian National Election Studies and evidence from the Constituent Assembly debates, they show how education, the media, and religious practice transmit the competing ideas that lie at the heart of ideological debates in India.

Work and Organizational Psychology Oct 21 2021 This text presents a selection of contributions to the Sixth European Congress of Work and Organizational Psychology held in Alicante (Spain) in April 1993, some of which have been previously published in the European Work and Organizational Psychologist. The contributions selected to appear in this volume focus on some of the principal questions scholars and professionals concerned with work and organizational psychology are tackling in Europe. The range of topics, theoretical approaches, methodologies, and orientations discussed illustrate the richness and variety of ideas currently studied in the discipline. The topics addressed in this text have a clear significance for the current European scene of work and organizational psychology. Although they are not the only ones, the areas discussed present important trends and interests within the discipline. The main sections include contributions which deal with psychological characteristics and processes of individuals at work, work experiences and their relationship with psychological well-being, the study of work entry and work socialization, the study of teamwork in organizations, the study of leadership in organizations, new forms of work and organization, and the phenomenon of work in a social context. This book is intended to be of relevance and interest to both academics and practitioners in the field of work and organizational psychology.
