Illustrated Encyclopedia of Human

Histology Aug 26 2019 During the past three decades, histology has seen enormous progress, thanks to new techniques and new investigation instruments. Numerous discoveries of important structures and morphofunctional phenomena have been described in a wealth of papers of ever increasing size and complexity. These publications have become difficult to follow, not only

because of their number, but also because of a disparity of terminology and the multitude of synonyms employed by different authors. All of this makes reading and comprehension of the progress that has been achieved laborious, even for histologists, but especially for students, researchers in other basic branches of medicine, or clinicians who have to consult histological texts during their studies or investigations. In order to facilitate the orientation of all those interested in histology, a concise and practical volume in encyclopedic style, defining and, at the same time, illustrating fundamental histological terms, enumerating synonyms, and describing morpho functional phenomena has become necessary, both because a work of this genre does not exist and because the list of Latin terms elaborated by the International Anatomical Nomenclature Committee in 1977 does not give illustrations or definitions of histological terms. The present work attempts to redress this deficiency.

Historic Cities of the Americas Jun 24 2019

With rare maps, prints, and photographs, this unique volume explores the dramatic history of the Americas through the birth and development of the hemisphere's great cities. Written by award-winning author David F. Marley, Historic Cities of the Americas covers the hard-to-find information of these cities' earliest years, including the unique aspects of each region's economy and demography, such as the growth of local mining, trade, or industry. The chronological layout, aided by the numerous

maps and photographs, reveals the exceptional changes, relocations, destruction, and transformations these cities endured to become the metropolises they are today. *Historic Cities of the Americas* provides over 70 extensively detailed entries covering the foundation and evolution of the most significant urban areas in the western hemisphere. Critically researched, this work offers a rare look into the times prior to Christopher Columbus' arrival in 1492 and explores the common difficulties overcome by these European-conquered or -founded cities as they flourished into some of the most influential locations in the world. Over 70 richly detailed entries on the most colorful, important cities of the New World, from Quebec City, Boston, and San Francisco in the Northern Hemisphere, to Buenos Aires, Cuzco, and Bahia in the Southern Hemisphere, are divided into four geographical sections (the Caribbean, Mexico and Central America, North America, and South America), enabling the reader to easily locate information. Hundreds of rare,

historically significant antique maps, prints, and photographs, enhancing both the value and appearance of the book. A very extensive bibliography, providing users with easy access to many hard-to-find materials.
