Delirious Naples Aug 19 2021 This book is addressed to "lovers of paradoxes" and we have done our utmost to assemble a stellar cast of Neapolitan and American scholars, intellectuals, and artists/writers who are strong and open-minded enough to wrestle with and illuminate the paradoxes through which Naples presents itself. Naples is a mysterious metropolis. Difficult to understand, it is an enigma to outsiders, and also to the Neapolitans themselves. Its very impenetrableness is what makes it so deliriously and irresistibly attractive. The essays attempt to give some hints to the answer of the enigma, without parsing it into neat scholastic formulas. In doing this, the book will be an important means of opening Naples to students, scholars and members of the community at large who are engaged in "identity-work." A primary goal has been to establish a dialogue with leading Neapolitan intellectuals and artists, and, ultimately, ensure that the "deliriously Neapolitan" dance continues.

[Delirious Consumption](#) Nov 21 2021 In the decades following World War II, the creation and expansion of massive domestic markets and relatively stable economies allowed for mass consumption on an unprecedented scale, giving rise to the consumer society that exists today. Many avant-garde artists explored the nexus between consumption and aesthetics, questioning how consumerism affects how we perceive the world, place ourselves in it, and make sense of it via perception and emotion. Delirious Consumption focuses on the two largest cultural economies in Latin America, Mexico and Brazil, and analyzes how their artists and writers both embraced and resisted the spirit of development and progress that defines the consumer moment in late capitalism. Sergio Delgado Moya looks specifically at the work of David Alfaro Siqueiros, the Brazilian concrete poets, Octavio Paz, and Lygia Clark to determine how each of them arrived at forms of aesthetic production balanced between high modernism and consumer culture. He finds in their works a provocative positioning vis-à-vis urban commodity capitalism, an ambivalent position that takes an assured but flexible stance against commodification, alienation, and the politics of domination and inequality that defines market economies. In Delgado Moya's view, these poets and artists appeal to uselessness, nonutility, and noncommunication—all markers of the aesthetic—while drawing on the terms proper to a world of consumption and consumer culture.

For seventeen years, Smith held the microphone for *Delirious?*—the mega-selling, Dove Award-winning, Grammy-nominated band that helped bring the modern worship movement into existence. Here Martin reflects on everything from the craft of leading worship to the challenges of parenthood to how to find a place of compassion within a culture of consumerism. [What Psychiatry Left Out of the DSM-5](#) Sep 27 2019 Choice Recommended Read What Psychiatry Left Out of the DSM-5: Historical Mental Disorders Today covers the diagnoses that the Diagnostic and Statistical Manual of Mental Disorders (DSM) failed to include, along with diagnoses that should not have been included, but were. Psychiatry as a field is over two centuries old and over that time has gathered great wisdom about mental illnesses. Today, much of that knowledge has been ignored and we have diagnoses such as "schizophrenia" and "bipolar disorder" that do not correspond to the diseases found in nature; we have also left out disease labels that on a historical basis may be real. Edward Shorter proposes a history-driven alternative to the DSM.

Delirious Mar 26 2022 Can postwar art be understood as an exercise in calculated insanity? Taking this provocative question as its basis, this book explores the art and history of delirium from 1950 to 1980, an era shaped by the brutality of World War II and the rapid expansion of industrial capitalism. Skepticism of science and technology along with fear of its capability to promote mass destruction developed into a distrust of rationalism, which profoundly influenced the art of the times. Delirious features work by more than sixty artists from Europe, Latin America, and the United States, including Dara Birnbaum, León Ferrari, Gego, Bruce Nauman, Howardena Pindell, Peter Saul, and Nancy Spero. Experimenting with irrational subject matter and techniques, these artists forged new strategies that directly responded to such unbalanced times. Disturbing and challenging, the works in this book in multiple media and often, counterintuitively, incorporating highly ordered and systematic structures upend traditional notions of aesthetic harmony. Three wide-ranging essays and a richly illustrated plates section investigate the degree to which delirious times demand delirious art, inviting readers to "think crazy." p.1 {margin: 0.0px 0.0px 0.0px 0.0px; font: 14.0px Verdana}

A Delirious Summer (Book #2) Nov 09 2020 To Neil Rucker, seven months, one week, and a day is too long to wait in between dates. But life as a Spanish language teacher to missionaries in Ecuador affords little opportunity for romance. When his worst student, Jay Jarvis, suggests a respite in Greenville, South Carolina, so begins Neil's delirious summer. Neil sees his chance to meet a sweet succession of southern women, but little does he know that the girls of Greenville are now more elusive than a snowflake in the Ecuadorian jungle. As they church-hop in search of the perfect man, Neil tries to find the perfect girl among the Neapolitan choices: a demanding redhead, a joy-riding blonde, and a very tardy but intriguing girl with raven hair and a pierced eyebrow. Who knew relational gumbo would look like this?

The Madness of Fear Jan 30 2020 What are the real disease entities in psychiatry? This is a question that has bedeviled the study of the mind for more than a century yet it is low on the research agenda of psychiatry. Basic science issues such as neuroimaging, neurochemistry, and genetics carry the day instead. There is nothing wrong with basic science research, but before studying the role of brain circuits or cerebral chemistry, shouldn't we be able to specify how the various diseases present clinically? Catatonia is a human behavioral syndrome that for almost a century was buried in the poorly designated psychiatric concept of schizophrenia. Its symptoms are well-know, and some of them are serious. Catatonic patients may die as their temperatures accelerate; they become dehydrated because they refuse to drink; they risk inanition because they refuse to eat or move. Autistic children with catatonia may hit themselves repeatedly in the head. We don't really know what catatonia is, in the sense that we know what pneumonia is. But we can identify it, and it is eminently treatable. Clinicians can make these patients better on a reliable basis. There are few other disease entities in psychiatry of which this is true. So why has there been so little psychiatric interest in catatonia? Why is it simply not on the radar of most clinicians? Catatonia actually occurs in a number of other medical illnesses as well, but it is certainly not on the radar of most internists or emergency physicians. In The Madness of Fear, Drs. Shorter and Fink seek to understand why this "vast field of ignorance" exists. In the history of catatonia, they see a remarkable story about how medicine flounders, and then seems to find its way. And it may help doctors, and the public, to recognize catatonia as one of the core illnesses in psychiatry.

Delirious Milton Jan 24 2022 The argument of Delirious Milton is that Milton's creative power is drawn from a rift at the center of his consciousness over the question of creation itself. This rift forces the poet to oscillate deliriously between two incompatible perspectives, at once affirming and denying the presence of spirit in what he creates. From one perspective, the act of creation is centered in God and the purpose of art is to imitate and praise the Creator. From the other perspective, the act of creation is centered in the human, in the built environment of the modern world.

Out of the Blur May 16 2021 A 2017 study by the Boston College Center for Work & Family found that all working dads across generations would like to spend more time with their children. But it's much easier said than done. Irreverent corporate author James Sudakow aims to detangle entrepreneurship and parenthood and demystify what it means to manage that much needed balance in his new book, Out of the Blur: A Delirious Dad's Search for The Holy Grail of Work-Life Balance (Purple Squirrel Media, September 2018).

Sudakow, author of the humorous illustrated corporate glossary *Picking the Low-Hanging Fruit... and Other Stupid Stuff We Say in the Corporate World* (Purple Squirrel Media, 2016), brings his signature irreverent tone to the much discussed topic of work-life balance in *Work-Life Blur*. With illustrations from Todd Kale, Sudakow tells his story of building and running a small business while raising a family, and aims to help readers figure out how to define what they want their work-life balance to look like while identifying and solving the traps and habits many fall into that get in the way of truly reaching balance. Despite being told from an entrepreneurial dad's point of view, *Out of the Blur* seeks to discuss the challenges all parents face while trying to be everything they need and want to be for their families while achieving the successes they need and want to at work - whether their job be entrepreneurial or traditional.

Down and Delirious in Mexico City Nov 02 2022 MEXICO CITY, with some 20 million inhabitants, is the largest city in the Western Hemisphere. Enormous growth, raging crime, and tumultuous politics have also made it one of the most feared and misunderstood. Yet in the past decade, the city has become a hot spot for international business, fashion, and art, and a magnet for thrill-seeking expats from around the world. In 2002, Daniel Hernandez traveled to Mexico City, searching for his cultural roots. He encountered a city both chaotic and intoxicating, both underdeveloped and hypermodern. In 2007, after quitting a job, he moved back. With vivid, intimate storytelling, Hernandez visits slums populated by ex-punks; glittering, drug-fueled fashion parties; and pseudo-native rituals catering to new-age Mexicans. He takes readers into the world of youth subcultures, in a city where punk and emo stand for a whole way of life—and sometimes lead to rumbles on the streets. Surrounded by volcanoes, earthquake-prone, and shrouded in smog, the city that Hernandez lovingly chronicles is a place of astounding manifestations of danger, desire, humor, and beauty, a surreal landscape of “cosmic violence.” For those who care about one of the most electrifying cities on the planet, “*Down & Delirious in Mexico City* is essential reading!” (David Lida, author of *First Stop in the New World*).

Delirious Delhi Feb 22 2022 'Delhi exists in a kind of quantum state: in Delhi, all things are true at once. When the Big Apple no longer felt big enough, Dave and Jenny moved to a city of sixteen million people - and, seemingly, twice that many horns honking at once. *Delirious Delhi* depicts India's capital as the two experienced it, from office life in the rising tech hubs to the traffic jam philosophy that keeps people sane in the gridlock leading to them. With only their sense of humour as their guide, Dave and Jenny set out to explore a city in which ancient stone monuments compete with glass-clad shopping malls to define the landscape. What follows is a top-to-bottom snapshot of a city in the thick of loud and accelerating change. Anyone new to Delhi will have their understanding of it magnified by this book. And anyone who already knows Delhi will appreciate this candid tribute to a city that 's everything to everyone at the same time.

Delirious New York May 28 2022 Since its original publication in 1978, *Delirious New York* has attained mythic status. Back in print in a newly designed edition, this influential cultural, architectural, and social history of New York is even more popular, selling out its first printing on publication. Rem Koolhaas's celebration and analysis of New York depicts the city as a metaphor for the incredible variety of human behavior. At the end of the nineteenth century, population, information, and technology explosions made Manhattan a laboratory for the invention and testing of a metropolitan lifestyle -- "the culture of congestion" -- and its architecture. "Manhattan," he writes, "is the 20th century's Rosetta Stone . . . occupied by architectural mutations (Central Park, the Skyscraper), utopian fragments (Rockefeller Center, the U.N. Building), and irrational phenomena (Radio City Music Hall)." Koolhaas interprets and reinterprets the dynamic relationship between architecture and culture in a number of telling episodes of New York's history, including the imposition of the Manhattan grid, the creation of Coney Island, and the development of the skyscraper. *Delirious New York* is also packed with intriguing and fun facts and illustrated with witty watercolors and quirky archival drawings, photographs, postcards, and maps. The spirit of this visionary investigation of Manhattan equals the energy of the city itself.

Montage and the Metropolis Aug 26 2019 Montage has been hailed as one of the key structural principles of modernity, yet its importance to the history of modern thought about cities and their architecture has never been adequately explored. In this groundbreaking new work, Martino Stierli charts the history of montage in late 19th-century urban and architectural contexts, its application by the early 20th-century avant-gardes, and its eventual appropriation in the postmodern period. With chapters focusing on photomontage, the film theories of Sergei Eisenstein, Mies van der Rohe's spatial experiments, and Rem Koolhaas's use of literary montage in his seminal manifesto *Delirious New York* (1978), Stierli demonstrates the centrality of montage in modern explorations of space, and in conceiving and representing the contemporary city. Beautifully illustrated, this interdisciplinary book looks at architecture, photography, film, literature, and visual culture, featuring works by artists and architects including Mies, Koolhaas, Paul Citroen, George Grosz, Hannah Höch, El Lissitzky, and Le Corbusier.
