**The Making of the Middle Sea** Jun 04 2020 The Mediterranean has been for millennia one of the global cockpits of human endeavour. World-class interpretations exist of its Classical and subsequent history, but

there has been remarkably little holistic exploration of how its societies, culture and economies first came into being, despite the fact that almost all the fundamental developments originated well before 500 bc. This book is the first full, interpretive synthesis for a generation on the rise of the Mediterranean world from its beginning, before the emergence of our own species, up to the threshold of Classical times. Extensively illustrated and ranging across disciplines, subject matter and chronology from early humans and the origins of farming and metallurgy to the rise of civilizations - Egyptian, Levantine, Hispanic, Minoan, Mycenaean, Phoenician, Etruscan, early Greek - the book is a masterpiece of archaeological and historical writing.

*Cooperative Enterprises in Australia and Italy* May 04 2020 This book arises from a three-year comparative research program concerning cooperative enterprises in Australia and Italy. The book explores the historical development, legal framework and the peak organisations of co-operatives in the two countries. Specific comparative chapters focus on consumer, credit, and worker-producer co-operatives. The book deepens the analysis of co-operatives by containing chapters that examine specific theoretical and empirical issues such as the theory of co-operative firms as collective entrepreneurial action. Monographic chapters include more in depth analysis of specific typologies of co-operatives, such as social and community oriented co-operatives, some of which were created to contrast organized crime in Southern Italy. The book concludes with an assessment of the implications of the project for public policy.

*A History of Gold and Money, 1450 to 1920* Jul 26 2019 For much of human history, the motive force behind war, conquest, social conflict and

world exploration has been the drive to acquire gold. From the ancient world of Croesus to the wealthy dynasties of Renaissance Italy, from the earliest European explorations into Africa, America, and Asia to the gold rushes of the nineteenth century and the banking crises that lay beyond them, Pierre Vilar depicts the awesome power of avarice to structure the world in which we live. The insidious power of gold and money is the subject of this enlightening and entertaining history. The age of exploration brought an influx of treasure into Western Europe, prompting disputes between theologians and early economists over the causes of inflation in the sixteenth century. In time, American silver distorted metropolitan Spanish society beyond recognition. Vilar goes on to examine the roots of the modern banking and financial systems in institutions founded in Holland, England and France during the seventeenth and eighteenth centuries. And in the nineteenth century, the gold rushes of Australia, California and South Africa generated new modifications in the international monetary system. Vilar concludes the story of these developments with a discussion of the crisis of the 1920s that, in the wake of the world credit crash of 2008, is more pertinent than ever. *A History of Gold and Money* provides a unique work of synthesis on the role of money in modern economic history.

**Handbook of International Futurism** Aug 07 2020 The Handbook of International Futurism is the first reference work ever to presents in a

comparative fashion all media and countries in which the movement, initiated by F.T. Marinetti in 1909, exercised a particularly noteworthy influence. The handbook offers a synthesis of the state of scholarship regarding the international radiation of Futurism and its influence in some fifteen artistic disciplines and thirty-eight countries. While acknowledging the great achievements of the movement in the visual and literary arts of Italy and Russia, it treats Futurism as an international, multidisciplinary phenomenon that left a lasting mark on the manifold artistic manifestations of the early twentieth-century avant-garde. Hundreds of artists, who in some phase in their career absorbed Futurist ideas and stylistic devices, are presented in the context of their national traditions, their international connections and the media in which they were predominantly active. The handbook acts as a kind of multi-disciplinary, geographical encyclopaedia of Futurism and gives scholars with varying levels of experience a detailed overview of all countries and disciplines in which the movement had a major impact.

Gender from Latin to Romance Dec 31 2019 This book explores grammatical gender in the Romance languages and dialects and its evolution from Latin. Michele Loporcaro investigates the significant diversity found in the Romance varieties in this regard; he draws on data from the Middle Ages to the present from all the Romance languages and dialects, discussing examples from Romanian to Portuguese and crucially also focusing on less widely-studied varieties such as Sursilvan, Neapolitan, and Asturian. The investigation first reveals that several varieties display more complex systems than the binary masculine/feminine contrast familiar from modern French or Italian. Moreover, it emerges that traditional accounts, whereby neuter gender was lost in the spoken Latin of the late Empire, cannot be correct: instead, the neuter gender underwent a range of different transformations from Late Latin onwards, which are responsible for the different systems that can be observed today across the Romance languages. The volume provides a detailed description of many of these systems, which in turns reveals a wealth of fascinating data, such as varieties where 'husbands' are feminine and others where 'wives' are

masculine; dialects in which nouns overtly mark gender, but only in certain syntactic contexts; and one Romance variety (Asturian) in which it appears that grammatical gender has split into two concurrent systems. The volume will appeal to linguists from a range of backgrounds, including Romance linguistics, historical linguistics, typology, and morphosyntax, and is also of relevance to those working in sociology, gender studies, and psychology.

**Age in the Welfare State** Jul 06 2020 This book asks why some countries devote the lion's share of their social policy resources to the elderly, while others have a more balanced repertoire of social spending. Far from being the outcome of demands for welfare spending by powerful age-based groups in society, the 'age' of welfare is an unintended consequence of the way that social programs are set up. The way that politicians use welfare state spending to compete for votes, along either programmatic or particularistic lines, locks these early institutional choices into place. So while society is changing - aging, divorcing, moving in and out of the labor force over the life course in new ways - social policies do not evolve to catch up. The result, in occupational welfare states like Italy, the United States, and Japan, is social spending that favors the elderly and leaves working-aged adults and children largely to fend for themselves.

**Andean Tectonics** Jun 28 2022 Andean Tectonics addresses the geologic evolution of the Andes Mountains, the prime global example of subduction-related mountain building. The Andes Mountains form one of the most extensive orogenic belts on Earth, spanning approximately an 8,000-km distance along the western edge of South America, from ~10°N to ~55°S. The tectonic history of the Andes involves a rich record of diverse geological processes, including crustal deformation, magmatism, sedimentary basin evolution, and climatic interactions. This book addresses the range of Andean tectonic processes and their temporal and spatial variations. An improved understanding of these processes is fundamental not only to the Andes but also to other major orogenic systems associated with subduction of the oceanic lithosphere. Andean Tectonics is a critical resource for researchers interested in the causes and consequences of Andean-type orogenesis and the long-term evolution of fold-thrust belts, magmatic arcs, and forearc and foreland basins. Evaluates the history of Andean mountain building over the past 300 million years Integrates recent studies and new perspectives on the complementary records of deformation, magmatism, and sedimentary basin evolution and their interactions in time and space Provides insight into the development of the northern, central, and southern Andes, which have typically been considered in isolation

*Translation and Intellectual Property Rights* Oct 09 2020 The purpose of this study is to provide an overview of some of the main intellectual property right issues relevant to the domain of translation. It focuses on copyright and database rights at international, European, and national levels. National legal regimes in four European Member States (i.e., Belgium, France, Germany and the United Kingdom) have been compared for illustration purposes. The study takes an "upstream" and "downstream" approach in order to answer the following three questions: (i) Are source documents protected by copyright and how does that protection affect the right to translate them? (Upstream or "input" approach, i.e., focus on the rights on the pre-existing source documents). (ii) Are translations protected by copyright and, if so, how? (Downstream or "output" approach, i.e., focus on the rights on the work product). (iii) Are databases that segment and align source documents and translations protected and, if so, how? (Link between the input and the output). The study covers both traditional translations and machine-aided translations. The main principles and findings developed in the Study are summarised below.

**In the Facebook Aquarium** Jun 24 2019 In their new work research collective Ippolita provides a critical investigation of the inner workings of Facebook as a model for all commercial social networks. Facebook is an extraordinary platform that can generate large profit from the daily activities of its users. Facebook may appear to be a form of free entertainment and self-promotion but in reality its users are working for the development of a new type of market where they trade relationships. As users of social media we have willingly submitted to a vast social, economic and cultural experiment. By critically examining the theories of Californian right-libertarians, Ippolita show the thread connecting Facebook to the European Pirate Parties, WikiLeaks and beyond. An important task today is to reverse the logic of radical transparency and apply it to the technologies we use on a daily basis.
