A More Beautiful Question Feb 22 2022 To get the best answer-in business, in life-you have to ask the best possible question. Innovation expert Warren Berger shows that ability is both an art and a science. It may be the most underappreciated tool at our disposal, one we learn to use well in infancy-and then abandon as we grow older. Critical to learning, innovation, success, even to happiness-yet often discouraged in our schools and workplaces-it can unlock new business opportunities and reinvent industries, spark creative insights at many levels, and provide a transformative new outlook on life. It is the ability to question-and to do so deeply, imaginatively, and "beautifully." In this fascinating exploration of the surprising power of questioning, innovation expert Warren Berger reveals that powerhouse businesses like Google, Nike, and Netflix, as well as hot Silicon Valley startups like Pandora and Airbnb, are fueled by the ability to ask fundamental, game-changing questions. But Berger also shares human stories of people using questioning to solve everyday problems-from "How can I adapt my career in a time of constant change?" to "How can I step back from the daily rush and figure out what really makes me happy?" By showing how to approach questioning with an open, curious mind and a willingness to work through a series of "Why," "What if," and "How" queries, Berger offers an inspiring framework of how we can all arrive at better solutions, fresh possibilities, and greater success in business and life.

To Have or Not to Have That Is the Question Jan 24 2022 After having lectured at large corporations around Brazil and several other countries, Rabbi Bonder wrote this book to meet the rising interest in the business world for spirituality. This book is about the ultra-wisdom to be found in frontiers between intelligence and ignorance. The very border that divides between clarity and superstition, intuition and illusion, discernment and fantasy, is an area of mixed light and darkness. In this twilight zone abide truths that will never turn into certainties. This is the zone where good sense is usually not the common sense, but a countersense. Where wisdom is forged out of experience, sensitivity and intuition; where doubt is the resource and where fog rather than light is the medium. Companies searching for their earthly kingdom have discovered that the intelligence of the kingdom of heaven could be of some use for efficiency sake, and in a highly competitive world nobody can afford to ignore a form of intelligence. In our days, we have begun to recognize a field of thought that until just recently was seen as lying outside the realm of categories of intelligence.
