Nationalism in the New World Jun 30 2022 Nationalism in the New World brings together work by scholars from the United States, Canada, Latin America, and Europe to discuss the common problem of how the nations of the Americas grappled with the basic questions of nationalism: Who are we? How do we imagine ourselves as a nation? Debates over the origins and meanings of nationalism have emerged at the forefront of the humanities and social sciences over the past two decades. However, these discussions have been mostly about nations in Europe, the Middle East, Asia, or Africa. In addition, their focus is usually on the violence spawned by ethnic and religious strains of nationalism, which have been largely absent in the Americas. The contributors to this volume "Americanize" the conversation on nationalism. They ask how the countries of the Americas fit into the larger world of nations and in what ways they present distinctive forms of nationhood. Such questions are particularly important because, as the editors write, "the American nations that came into being in the wake of revolutions that shook the Atlantic world beginning in 1776 provided models of what the modern world might become." American nations were among the first nation-states to emerge on the world stage. As former colonies with multiethnic populations, American nations could not logically rest their claim to nationhood on ancient bonds of blood and history. Out of a world of empires and colonies the independent states of the Americas forged new nations based on a varied mix of modern civic ideals instead of primordial myths, on ethnic and religious diversity instead of common descent, and on future hopes rather than ancient roots.

Gender Mainstreaming in Poverty Eradication and the Millennium Development Goals Mar 28 2022 In this book, Naila Kabeer brings together a set of arguments, findings and lessons from the development literature which help to explain why gender equality merits specific attention from policy-makers, practitioners, researchers and other stakeholders committed to the pursuit of pro-poor and human-centred development. Neglect of gender inequalities in the distribution of resources, responsibilities and power in the processes of economic accumulation and social reproduction has a high cost, not only for women themselves but also for their children and other dependents and for the development of society as a whole. This book highlights the interconnections between production and reproduction within different societies, and women's critical role in straddling both, and points to the various synergies, trade-offs and externalities which these generate.

Non-State Actors in International Law Aug 21 2021 The role and position of non-state actors in international law is the subject of a long-standing and intensive scholarly debate. This book explores the participation of this new category of actors in an international legal system that has historically been dominated by states. It explores the most important issues, actors and theoretical approaches with respect to these new participants in international law. It provides the reader with a comprehensive and state-of-the-art overview of the most important legal and political developments and perspectives. Relevant non-state actors discussed in this volume include, in particular, international governmental organisations, international non-governmental organisations, multinational companies, investors and armed opposition groups. Their legal position is considered in relation to specific issue-areas, such as humanitarian law, human rights, the use of force and international responsibility. The main legal theories on non-state actors' position in international law – neo-positivism, the policy-oriented approach and transnational law – are covered at the beginning of the book, and the essential political science perspectives – on non-state actors' role in international politics and globalisation, as well as their soft power – are presented at the end.

Nursing Interventions Classification (NIC) - E-Book Dec 13 2020 Covering the full range of nursing interventions, Nursing Interventions Classification (NIC), 6th Edition provides a research-based clinical tool to help in selecting appropriate interventions. It standardizes and defines the knowledge base for nursing practice while effectively communicating the nature of nursing. More than 550 nursing interventions are provided — including 23 NEW labels. As the only comprehensive taxonomy of nursing-sensitive interventions available, this book is ideal for practicing nurses, nursing students, nursing administrators, and faculty seeking to enhance nursing curricula and improve nursing care. More than 550 research-based nursing intervention labels with nearly 13,000 specific activities Definition, list of activities, publication facts line, and background

readings provided for each intervention. NIC Interventions Linked to 2012-2014 NANDA-I Diagnoses promotes clinical decision-making. New! Two-color design provides easy readability. 554 research-based nursing intervention labels with nearly 13,000 specific activities. NEW! 23 additional interventions include: Central Venous Access Device Management, Commendation, Healing Touch, Dementia Management: Wandering, Life Skills Enhancement, Diet Staging: Weight Loss Surgery, Stem Cell Infusion and many more. NEW! 133 revised interventions are provided for 49 specialties, including five new specialty core interventions. NEW! Updated list of estimated time and educational level has been expanded to cover every intervention included in the text.

Simians, Cyborgs, and Women Oct 03 2022 Simians, Cyborgs and Women is a powerful collection of ten essays written between 1978 and 1989. Although on the surface, simians, cyborgs and women may seem an odd threesome, Haraway describes their profound link as "creatures" which have had a great destabilizing place in Western evolutionary technology and biology. Throughout this book, Haraway analyzes accounts, narratives, and stories of the creation of nature, living organisms, and cyborgs. At once a social reality and a science fiction, the cyborg--a hybrid of organism and machine--represents transgressed boundaries and intense fusions of the nature/culture split. By providing an escape from rigid dualisms, the cyborg exists in a post-gender world, and as such holds immense possibilities for modern feminists. Haraway's recent book, *Primate Visions*, has been called "outstanding," "original," and "brilliant," by leading scholars in the field. (First published in 1991.)

Media Worlds Feb 24 2022 This groundbreaking volume showcases the exciting work emerging from the ethnography of media, a burgeoning new area in anthropology that expands both social theory and ethnographic fieldwork to examine the way media—film, television, video—are used in societies around the globe, often in places that have been off the map of conventional media studies. The contributors, key figures in this new field, cover topics ranging from indigenous media projects around the world to the unexpected effects of state control of media to the local impact of film and television as they travel transnationally. Their essays, mostly new work produced for this volume, bring provocative new theoretical perspectives grounded in cross-cultural ethnographic realities to the study of media.

Novum Organum Apr 28 2022 Sir Francis Bacon's "Novum Organum" is a treatise meant to adjust the thought and methodology of learning about and understanding science and nature. Learn about the four Idols and the inductive method outlined in this keystone philosophy work. This is now known as the Baconian method. The title is a reference to Aristotle's work *Organon*, which was his treatise on logic and syllogism. Ultimately, the *Novum Organum* is defined as the "New Tool." But, a new tool for what, and why is it 'new'? In this book Bacon demonstrates the use of the scientific method to discover knowledge about the natural world. Many of the examples in this volume concern the nature of heat and energy.

Code Feb 01 2020 There's a common belief that cyberspace cannot be regulated—that it is, in its very essence, immune from the government's (or anyone else's) control. *Code*, first published in 2000, argues that this belief is wrong. It is not in the nature of cyberspace to be unregulable; cyberspace has no "nature." It only has code—the software and hardware that make cyberspace what it is. That code can create a place of freedom—as the original architecture of the Net did—or a place of oppressive control. Under the influence of commerce, cyberspace is becoming a highly regulable space, where behavior is much more tightly controlled than in real space. But that's not inevitable either. We can—we must—choose what kind of cyberspace we want and what freedoms we will guarantee. These choices are all about architecture: about what kind of code will govern cyberspace, and who will control it. In this realm, code is the most significant form of law, and it is up to lawyers, policymakers, and especially citizens to decide what values that code embodies. Since its original publication, this seminal book has earned the status of a minor classic. This second edition, or Version 2.0, has been prepared through the author's wiki, a web site that allows readers to edit the text, making this the first reader-edited revision of a popular book.

The Scorpion's Sweet Venom Mar 04 2020 "If I'm going to be a prostitute, I refuse to be an ordinary one." Known to her clients as "Bruna the Surfer Girl," Surfistinha is the beautiful 17-year-old Brazilian run-away from a middle class family who detailed online her three years working as a prostitute in a posh Brazilian suburb. Her candid and explicit entries on life as a high-class call girl caught the attention of millions and set off a vigorous national debate about sexual identity, values, and practices. As a result, Bruna became an immediate celebrity, the Paris Hilton of Brazil. Here, in *The Scorpion's Sweet Venom*, she draws back the sheets to reveal the whole story. Bruna writes passionately about her estranged family, her out-of-control drug use, her unbridled sexuality, and her unusual adventures in the world's oldest profession. "I have seen and done everything," she confesses. "There is nothing left that scares me." Part memoir, part cautionary tale, part sex guide, Bruna brings to life the raw, desperate and dangerous underbelly of the Brazilian sex trade, and shares outrageous advice for the bedroom, like what men really want but are too afraid to ask. Provocative, seductive and unforgettable, *The Scorpion's Sweet Venom* is the vivid account of a young girl's life on the street, and a fearless expression of human sexuality. Bruna Surfistinha is the pseudonym of a now twenty-something Brazilian prostitute who attracted the attention of the Brazilian public after she published sexually charged diary entries on her blog, www.brunasurfistinha.com. She currently lives in Sao Paulo.

News as Entertainment Jan 26 2022 "Thussu brings to this project the passion for news of a socially committed former journalist, the political economy of his international relations education and a formidable assembly of global detail, examining the recent explosion of 'infotainment'." - John Downing, Southern Illinois University "Thussu's account of war as infotainment, the Bollywoodization of news and the emergence of a global infotainment sphere is as compelling as it is alarming. This is a significant and essential book for anyone interested in exploring the connections between news journalism, informed citizenship and democracy." - Bob Franklin, The Cardiff School of Journalism, Media and Cultural Studies Richly detailed and empirically grounded, this first book-length study of infotainment and its globalization by a leading scholar of global communication, offers a comprehensive and critical analysis of this emerging phenomenon. Going beyond - both geographically and theoretically - the 'dumbing down' discourse, largely confined to the Anglo-American media, the book argues that infotainment may have an important ideological role, a diversion in which 'soft news' masks the hard realities of neo-liberal imperialism. Chapters include a historical appraisal of infotainment; the infrastructure for its globalization as well as coverage of recent wars on television news as high-tech infotainment and the growing synergies between Hollywood and Bollywood-originated infotainment. A 'global infotainment sphere' is emerging, the book argues, within which competing versions of news - from 24/7 news networks to bloggers - coexist. Accessible, engagingly written and robustly argued, the book combines analyses of theoretical debates on infotainment with extensive and up-to-date comparative data.

Intermediate Public Economics, second edition Dec 25 2021 A new edition of a comprehensive text, updated throughout, with new material on behavioral economics, international taxation, cost-benefit analysis, and the economics of climate policy. Public economics studies how government taxing and spending activities affect the economy—economic efficiency and the distribution of income and wealth. This comprehensive text on public economics covers the core topics of market failure and taxation as well as recent developments in both policy and the academic literature. It

is unique not only in its broad scope but in its balance between public finance and public choice and its combination of theory and relevant empirical evidence. The book covers the theory and methodology of public economics; presents a historical and theoretical overview of the public sector; and discusses such topics as departures from efficiency (including imperfect competition and asymmetric information), issues in political economy, equity, taxation, fiscal federalism, and tax competition among independent jurisdictions. Suggestions for further reading, from classic papers to recent research, appear in each chapter, as do exercises. The mathematics has been kept to a minimum without sacrificing intellectual rigor; the book remains analytical rather than discursive. This second edition has been thoroughly updated throughout. It offers new chapters on behavioral economics, limits to redistribution, international taxation, cost-benefit analysis, and the economics of climate policy. Additional exercises have been added and many sections revised in response to advice from readers of the first edition.

Culture of Democracy Jul 28 2019 Can democracy be taught and how? This book examines many examples of educational activities focusing on democracy and citizenship that have been carried out by institutions taking part in UNESCO's Associated Schools Projects in different parts of the world. Readers will find a range of lively and practical examples that are workable even with limited material resources.

Interpreting Statutes May 18 2021 This book is a work of outstanding importance for scholars of comparative law and jurisprudence and for lawyers engaged in EC law or other international forms of practice. It reviews, compares and analyses the practice of interpretation in nine countries representing Europe as well as the US and Argentina in common and civil law; it also explores implications for general theories of interpretation and of justification. Its authors, who include Aulis Aarnio, Robert Alexy, Ralf Dreier, Enrique Zuleta-Puceiro, Michel Troper, Christophe Grzegorzczak, Jean-Louis Gardes, Enrico Pattaro, Michele Taruffo, Massimo La Torre, Jerry Wroblewski, Aleksander Peczenik, Gunnar Bergholtz and Zenon Bankowski, as well as editors Robert S. Summers and D. Neil MacCormick, constitute an international team of great distinction; they have worked on this project for over seven years.

Tracking Medicine Nov 23 2021 Written by a groundbreaking figure of modern medical study, Tracking Medicine is an eye-opening introduction to the science of health care delivery, as well as a powerful argument for its relevance in shaping the future of our country. An indispensable resource for those involved in public health and health policy, this book uses Dr. Wennberg's pioneering research to provide a framework for understanding the health care crisis; and outlines a roadmap for real change in the future. It is also a useful tool for anyone interested in understanding and forming their own opinion on the current debate.

Early Settlement and Subsistence in the Casma Valley, Peru Dec 01 2019 The Casma Valley of Peru's north central coast contains the largest New World structure of its time period--2500 to 200 BC--as well as one of the densest concentrations of early sites. In this detailed and thought-provoking volume, Sheila and Thomas Pozorski date each major early site, assess this important valley's diet and subsistence changes through time, and begin to reconstruct the development of Casma Valley society. Fifteen sites are surveyed, including Pampa de las Llamas-Moxeque, the earliest planned city in the New World. The Pozorskis then synthesize their own fieldwork and previous work in the Casma Valley to chart its development during the critical time when civilization was emerging. The result: a scenario which is somewhat revolutionary in the context of more traditional views of Andean prehistory. Early Settlement and Subsistence in the Casma Valley, Peru adds substantially to the growing body of evidence that the earliest development of Andean civilization occurred on the coast rather than in the highlands. This volume presents comparative data for students of emerging civilizations worldwide and will be of value not only to Andean and New World archaeologists but also to everyone interested in the emergence of complex societies.

Taking Rights Seriously Jul 20 2021 What is law? What is it for? How should judges decide novel cases when the statutes and earlier decisions provide no clear answer? Do judges make up new law in such cases, or is there some higher law in which they discover the correct answer? Must everyone always obey the law? If not, when is a citizen morally free to disobey?

Unsaturated Soil Mechanics in Engineering Practice Feb 12 2021 The definitive guide to unsaturated soil—from the world's experts on the subject This book builds upon and substantially updates Fredlund and Rahardjo's publication, Soil Mechanics for Unsaturated Soils, the current standard in the field of unsaturated soils. It provides readers with more thorough coverage of the state of the art of unsaturated soil behavior and better reflects the manner in which practical unsaturated soil engineering problems are solved. Retaining the fundamental physics of unsaturated soil behavior presented in the earlier book, this new publication places greater emphasis on the importance of the "soil-water characteristic curve" in solving practical engineering problems, as well as the quantification of thermal and moisture boundary conditions based on the use of weather data. Topics covered include: Theory to Practice of Unsaturated Soil Mechanics Nature and Phase Properties of Unsaturated Soil State Variables for Unsaturated Soils Measurement and Estimation of State Variables Soil-Water Characteristic Curves for Unsaturated Soils Ground Surface Moisture Flux Boundary Conditions Theory of Water Flow through Unsaturated Soils Solving Saturated/Unsaturated Water Flow Problems Air Flow through Unsaturated Soils Heat Flow Analysis for Unsaturated Soils Shear Strength of Unsaturated Soils Shear Strength Applications in Plastic and Limit Equilibrium Stress-Deformation Analysis for Unsaturated Soils Solving Stress-Deformation Problems with Unsaturated Soils Compressibility and Pore Pressure Parameters Consolidation and Swelling Processes in Unsaturated Soils Unsaturated Soil Mechanics in Engineering Practice is essential reading for geotechnical engineers, civil engineers, and undergraduate- and graduate-level civil engineering students with a focus on soil mechanics.

Innovation and Entrepreneurship Apr 04 2020 Innovation and Entrepreneurship 3rd Edition is an accessible text on innovation and entrepreneurship aimed specifically at undergraduate students studying business and management studies, but also those on engineering and science degrees with management courses. The text applies key theories and research on innovation and entrepreneurship and then reviews and synthesises those theories and research to apply them in a much broader and contemporary context, including the corporate and public services, emerging technologies and economies, and sustainability and development and creating and capturing value from innovation and entrepreneurship. In this third edition the authors continue to adopt an explicit process model to help organise the material with clear links between innovation and entrepreneurship. This text has been designed to be fully integrated with the Innovation Portal at www.innovation-portal.info, which contains an extensive collection of additional resources for both lecturers and students, including teaching resources, case studies, media clips, innovation tools, seminar and assessment activities and test questions.

Quality Assurance of Health Services Jun 06 2020 This report presents a policy- and methodology-oriented discussion of factors involved in developing and analyzing quality assurance in European health care. Data are taken from research literature and interviews with representatives of national health authorities, professional organizations, and research and educational institutions. The first chapter of this report discusses a suggested conceptual framework, for a program of health care quality assurance, derived from evaluative research and industrial quality control. The second, third, and fourth chapters deal with three major variables in the framework: environment, conceptualization, and methodology. Examples of different approaches to quality assurance are given, and sources of information and measurement instruments and criteria are examined. The fifth chapter presents conclusions concerning the trends and state of quality assurance in health care. A bibliography of 179 items is appended. (FG)

Congruence in Contact-Induced Language Change Oct 11 2020 Modern contact linguistics has primarily focused on contact between languages that are genetically unrelated and structurally distant. This compendium of articles looks instead at the effects of pre-existing structural congruency between the affected languages at the time of their initial contact, using the Romance and Slavic languages as examples. In contact of this kind, both genetic and typological similarities play a part.

Essential Cell Biology May 06 2020 Essential Cell Biology provides a readily accessible introduction to the central concepts of cell biology, and its lively, clear writing and exceptional illustrations make it the ideal textbook for a first course in both cell and molecular biology. The text and figures are easy-to-follow, accurate, clear, and engaging for the introductory student. Molecular detail has been kept to a minimum in order to provide the reader with a cohesive conceptual framework for the basic science that underlies our current understanding of all of biology, including the biomedical sciences. The Fourth Edition has been thoroughly revised, and covers the latest developments in this fast-moving field, yet retains the academic level and length of the previous edition. The book is accompanied by a rich package of online student and instructor resources, including over 130 narrated movies, an expanded and updated Question Bank. Essential Cell Biology, Fourth Edition is additionally supported by the Garland Science Learning System. This homework platform is designed to evaluate and improve student performance and allows instructors to select assignments on specific topics and review the performance of the entire class, as well as individual students, via the instructor dashboard. Students receive immediate feedback on their mastery of the topics, and will be better prepared for lectures and classroom discussions. The user-friendly system provides a convenient way to engage students while assessing progress. Performance data can be used to tailor classroom discussion, activities, and lectures to address students' needs precisely and efficiently.
