The Clause-Typing System of Plains Cree Aug 02 2020 This book offers detailed empirical coverage of the syntax and semantics of Plains Cree, an Algonquian language of western Canada. It combines careful elicitation with corpus studies to provide the first systematic investigation of the two distinct verbal inflectional paradigms - independent and conjunct - in the language. The book argues that the independent order denotes an indexical clause type with familiar deictic properties, while the conjunct order is an anaphoric clause type whose reference is determined by rules of anaphoric dependence. Both syntactic and semantic considerations are examined: on the syntactic side, indexical clauses are shown to be restricted to a subset of matrix environments, and to exclude proforms that have clause-external antecedents or induce cross-clausal dependencies. Anaphoric clauses have an elsewhere distribution: they occur in both matrix and dependent contexts, and freely host and participate in cross-clausal dependencies. The semantic discussion focusses primarily on the context in which a proposition is evaluated: it shows that indexical clauses have absolute tense and a speaker origo, consistent with deixis on a speech act; anaphoric clauses, by contrast, use anaphoric dependencies to establish the evaluation context. Data from Plains Cree is compared to the matrix/subordinate system found in English, to the clause-chaining system of the Amele language of Papua New Guinea, and to Romance subjunctive clauses. The book also provides the first micro-typology of pronominal marking and initial change in Algonquian languages.

Multiple Perspectives on the Effects of Evaluation on Performance Sep 15 2021 In the field of psychology, research areas often develop in relative isolation. Researchers in different areas are either not aware of, or seem to fail to see the relevance of findings from other areas even though it would seem that the findings are directly relevant to their own. One striking example of this is to be found in research that focuses on the effects of evaluation on performance. This volume integrates thinking from five different research traditions - Achievement Goals, Intrinsic vs. Extrinsic Motivation, Goal Setting, Social Loafing, and Social Facilitation - through the unique format of a give-and-take conversation between leading academics from each.

Academic Writing - Student Term Papers - Structure, Introductions, Conclusions Sep 27 2022 Seminar paper from the year 1997 in the subject English Language and Literature Studies - Other, Martin Luther University, course: Seminar Academic Discourse, language: English, abstract: Academic writing is a task that students, especially in the social sciences, engage in very frequently during the course of their studies. They have to compose essays, research reports, term papers etc., which, besides being the basis for students' evaluation, are to prepare them for their professional careers later in life. For those who will stay in the field, writing is going to be a major activity. At university a student's writing skills set him or her apart from other students in the eyes of the professor, but there is no real competition; all papers will be read by the instructors. In the professional world, however, with an abundance of academic texts and with limited time, only those articles will get attention that, besides containing profound reasoning, are at the same time well written, i.e. conveniently structured, precise, short, well formulated etc. This paper is part of a study on academic writing conducted within the seminar "Academic Discourse". The study examines students' works with regard to the authors' writing skills. It looks at the various components of a student term paper (linguistic features and structural elements) to detect the problems German students of English have. The objective is to create a guide for current and future students in this department experiencing difficulties in this area. It combines advice from published writing guides and professors, linguistic theory and personal experience, and is to be an introduction to academic writing for beginners and a reference booklet for the more experienced. We did not attempt to produce a "How-to" manual but rather tried to name the problem areas and to offer help on those with advice and examples. It cannot take the responsibility off the students for the further refinement of their skills by othe

Wisdom, Intelligence, and Creativity Synthesized Jan 27 2020 In *Wisdom, Intelligence, and Creativity Synthesized*, Sternberg reviews and summarizes the best research available on human intelligence. He argues that any serious understanding of intelligence must go beyond the standard paper and pencil tests currently in use. In addition to analytical and quantitative abilities, a theory of intelligence must take account of peoples' creative abilities - their ability to go beyond given information and imagine new and exciting ways of reformulating old problems. It must also take into account peoples' ability to weigh options carefully and act prudently. Understanding one's own intellectual shortcomings, and learning how to overcome, is as important as developing one's strengths. Sternberg develops a vision of human intelligence that is far more nuanced and accurate than anything previously offered. *Wisdom, Intelligence and Creativity Synthesized* will be essential reading for psychologists, cognitive scientists, educators, and organizational researchers.

Kindred Jul 25 2022 From the New York Times bestselling author of *Parable of the Sower* and MacArthur "Genius" Grant, Nebula, and Hugo award winner The visionary time-travel classic whose Black female hero is pulled through time to face the horrors of American slavery and explores the impacts of racism, sexism, and white supremacy then and

now. "I lost an arm on my last trip home. My left arm." Dana's torment begins when she suddenly vanishes on her 26th birthday from California, 1976, and is dragged through time to antebellum Maryland to rescue a boy named Rufus, heir to a slaveowner's plantation. She soon realizes the purpose of her summons to the past: protect Rufus to ensure his assault of her Black ancestor so that she may one day be born. As she endures the traumas of slavery and the soul-crushing normalization of savagery, Dana fights to keep her autonomy and return to the present. Blazing the trail for neo-slavery narratives like Colson Whitehead's *The Underground Railroad* and Ta-Nehisi Coates's *The Water Dancer*, Butler takes one of speculative fiction's oldest tropes and infuses it with lasting depth and power. Dana not only experiences the cruelties of slavery on her skin but also grimly learns to accept it as a condition of her own existence in the present. "Where stories about American slavery are often gratuitous, reducing its horror to explicit violence and brutality, *Kindred* is controlled and precise" (New York Times). "Reading Octavia Butler taught me to dream big, and I think it's absolutely necessary that everybody have that freedom and that willingness to dream." —N. K. Jemisin The series adaptation from FX premieres December 13 on Hulu. Developed for television by writer/executive producer Branden Jacobs-Jenkins (*Watchmen*), executive producers also include Joe Weisberg and Joel Fields (*The Americans*, *The Patient*), and Darren Aronofsky (*The Whale*). Janicza Bravo (*Zola*) is director and an executive producer of the pilot. *Kindred* stars Mallori Johnson, Micah Stock, Ryan Kwanten, and Gayle Rankin.
