The mighty entertainment industries could only stare in dismay, their back-room plans in tatters. This highly original analysis of three attempts to bring in new laws to defend copyright on the Internet - ACTA, Ley Sinde and the Digital Economy Act - investigates the dance of influence between lobbyists and their political proxies and unmasks the sophistry of their arguments. Copyright expert Monica Horten outlines the myriad ways that lobbyists contrived to bypass democratic process and persuade politicians to take up their cause in imposing an American corporate agenda. In doing so, she argues the case for stronger transparency in copyright policy-making. A Copyright Masquerade is essential reading for anyone who cares about copyright and the Internet, and to those who care about freedom of speech and good government.

Proceedings of the 13th International Congress on Mathematical Education Jul 25 2022 This book is open access under a CC BY 4.0 license. The book presents the Proceedings of the 13th International Congress on Mathematical Education (ICME-13) and is based on the presentations given at the 13th International Congress on Mathematical Education (ICME-13). ICME-13 took place from 24th- 31st July 2016 at the University of Hamburg in Hamburg (Germany). The congress was hosted by the Society of Didactics of Mathematics (Gesellschaft für Didaktik der Mathematik - GDM) and took place under the auspices of the International Commission on Mathematical Instruction (ICMI). ICME-13 brought together about 3.500 mathematics educators from 105 countries, additionally 250 teachers from German speaking countries met for specific activities. Directly before the congress activities were offered for 450 Early Career Researchers. The proceedings give a comprehensive overview on the current state-of-the-art of the discussions on mathematics education and display the breadth and deepness of current research on mathematical teaching-and-learning processes. The book introduces the major activities of ICME-13, namely articles from the four plenary lecturers and two plenary panels, articles from the five ICMI awardees, reports from six national presentations, three reports from the thematic afternoon devoted to specific features of ICME-13. Furthermore, the proceedings contain descriptions of the 54 Topic Study Groups, which formed the heart of the congress and reports from 29 Discussion Groups and 31 Workshops. The additional important activities of ICME-13, namely papers from the invited lecturers, will be presented in the second volume of the proceedings.

**Peer Power, Book Two** Sep 22 2019 The Peer Power Program is a peer training program designed for middle, high school, and higher education students, focusing on 8 core skills: Attending, Empathizing, Summarizing, Questioning, Genuineness, Assertiveness, Confrontation, and Problem Solving. Through a series of exercises, games, and self-awareness techniques, youth and adults involved in the program can gain the basic communication and mediation skills necessary to effectively help their peers. Picking up where Book One left off, the Peer Power, Book Two: Workbook brings the participating students through a series of Modules, focusing on how to apply the core skills learned in the first half of the program in real life situations. This volume covers topics such as drugs and alcohol abuse, taking care of you through stress management, leadership training, tutoring, group work, enhancing sexual health, disordered eating, suicide prevention, coping with loss, highway traffic safety, bullying reduction, mentoring, crisis management, character education, problem gambling prevention, and tobacco prevention.

*13th International Conference on Theory and Application of Fuzzy Systems and Soft Computing* (ICAFS 2018), held in Warsaw, Poland on August 27–28, 2018. It includes contributions from diverse areas of soft computing such as uncertain computation, Z-information processing, neuro-fuzzy approaches, evolutionary computing and others. The topics of the papers include theory of uncertainty computation; theory and application of soft computing; decision theory with imperfect information; neuro-fuzzy technology; image processing with soft computing; intelligent control; machine learning; fuzzy logic in data analytics and data mining; evolutionary computing; chaotic systems; soft computing in business, economics and finance; fuzzy logic and soft computing in the earth sciences; fuzzy logic and soft computing in engineering; soft computing in medicine, biomedical engineering and the pharmaceutical sciences; and probabilistic and statistical reasoning in the social and educational sciences. The book covers new ideas from theoretical and practical perspectives in economics, business, industry, education, medicine, the earth sciences and other fields. In addition to promoting the development and application of soft computing methods in various real-life fields, it offers a useful guide for academics, practitioners, and graduates in fuzzy logic and soft computing fields.

**Selected Papers from the 13th Estuarine and Coastal Modeling Conference** Dec 18 2021 This book is a printed edition of the Special Issue "Selected Papers from the 13th Estuarine and Coastal Modeling Conference" that was published in JMSE **Chamberlain's Symptoms and Signs in Clinical Medicine 13th Edition, An Introduction to Medical Diagnosis** Sep 15 2021 A classic text, Chamberlain's Symptoms and Signs in Clinical Medicine has been providing students and professionals with a detailed and well-illustrated account of the symptoms and signs of diseases affecting all the body systems since the first edition published in 1936. Now completely rewritten by a new team of authors selected for their experience and reputation in writing quality publications in their specialist fields, the 13th edition brings the title into line with current teaching and practice. One of the key challenges of writing a textbook of diagnostic medicine is to balance the "bottom up" approach of constructing a differential diagnosis from individual clinical findings, and the "top down" approach of learning the key features pertaining to a particular diagnosis. The 13th edition of Chamberlain's Symptoms and Signs in Clinical Medicine integrates both approaches into a coherent working framework that will assist the reader in preparing for academic and professional examinations, and in everyday practice. Presented in full colour and illustrated with relevant images, this book provides a thorough lesson in diagnostic medicine, ensuring the reader is fully prepared to deal with the challenging process of differential diagnosis through a thorough knowledge of the central features of the conditions that they are likely to encounter. Key features: Teaches the reader how to diagnose correctly through assessment of symptoms and signs while simultaneously recalling all key features of a given condition Full colour and generously illustrated Conforms with the core competencies required for the foundation years Includes bullet point lists and tip boxes Chapters conclude with a summary of key points for easy revision Written and edited by a highly experienced team of specialists Companion website

**Al-Hind: The Slavic Kings and the Islamic conquest, 11th-13th centuries** Aug 14 2021 During the eleventh to thirteenth centuries, Islamic conquest and trade laid the foundation for a new type of Indo-Islamic society in which the organizational forms of the frontier and of sedentary agriculture merged in a way that was uniquely successful in the late medieval world at large, setting the Indo-Islamic world apart from the Middle East and China in the same centuries.

*Proceedings of the 13th International Conference on Ubiquitous Information Management and Communication (IMCOM) 2019* Feb 20 2022 Over past few years, technologies have experienced boundaries getting blurred and concept of convergence to gain prominence. Harnessing from this, two main tracks for information processing management and communication are held, covering both research and application works of information management, intelligent information processing, interaction management, networking/ telecommunications, and social interaction. This book creates unique opportunity for research convergence among truly diverse technology domains of computer science. Leveraging from this diversity of topics, researchers get to generate novel research ideas by seeking application of their research in a different technology domain. This volume represents the collection of papers presented at the 13th International Conference on Ubiquitous Information Management and Communication (IMCOM 2019), held on 4-6 January 2019 in Phuket, Thailand. Out of 228 papers submitted from all around the world 88 papers were accepted for presentations. The 88 contributions to this volume are organized into 5 chapters: Chapter 1. Network Evolution, Chapter 2. Intelligent and Secure Network, Chapter 3. Image and Video Processing, Chapter 4. Information Technology and Society, and Chapter 5. Data Mining and Learning. Our editors wish readers to find this volume informative and enjoyable.

**Skill Wars** Oct 04 2020 Skill Wars shows how to increase productivity and profits by making investments in human capital development. It addresses the disparity between the available jobs and available workers. By education and training only 20% of all American workers can fit well into our demanding high-tech workplace. How do we train the 80%? Skill Wars defines the race between advanced technology investment and human resources investment and shows managers how to measure that investment. It introduces a Human Capital Scoreboard of seven new business management/measurement tools including a more accurate calculation of ROI (Return on Investment) for employee performance improvement programs. It also provides case studies of how quality training can deliver on more problem-solving/thinking skills. It has a foreword by Joseph Boyett, author of The Guru Guide and Workplace 2000. Skill Wars is a "basic workplace performance primer" that presents complex issues in a simple language and format that will move both business leaders and the American public to give their popular support. There are few viable alternatives. Gordon believes that, "Only at great peril can Americans continue to largely ignore the workplace as an important arena that helps structure learning for life."
