Every Day a Nightmare Apr 04 2020 In December 1941, the War Department sent two transports and a freighter carrying 103 P-40 fighters and their pilots to the Philippines to bolster Gen. Douglas MacArthur's Far East Air Force. They were then diverted to Australia, with new orders to ferry the P-40s to the Philippines from Australia through the Dutch East Indies. But on the same day as the second transport reached its destination on January 12, 1942, the first of the key refueling stops in the East Indies fell

to rapidly advancing Japanese forces, resulting in a break in their ferry route and another change in their orders. This time the pilots would fly their aircraft to Java to participate in the desperate Allied defense of that ultimate Japanese objective. Except for the pilots from the Philippines, almost all of the other pilots eventually assigned to the five provisional pursuit squadrons ordered to Java were recent graduates of flying school with just a few hours on the P-40. Only forty-three of them made it to their assigned destination; the rest suffered accidents in Australia, were shot down over Bali and Darwin, or were lost in the sinking of the USS Langley as it carried thirty-two of them to Java. Even those who did reach the secret field on Java wondered if they had been sacrificed for no purpose. As the Japanese air assault intensified daily, the Allied defense collapsed. Only eleven Japanese aircraft fell to the P-40s. Author William H. Bartsch has pored through personal diaries and memoirs of the participants, cross-checking these primary sources against Japanese aerial combat records of the period and supplementing them with official records and other American, Dutch, and Australian accounts. Bartsch's thorough and meticulous research yields a narrative that situates the Java pursuit pilots' experiences within the context of the overall strategic situation in the early days of the Pacific theater.

Liberation Day Dec 25 2021 NEW YORK TIMES BESTSELLER • “One of our most inventive purveyors of the form returns with pitch-perfect, genre-bending stories that stare into the abyss of our national character. . . . An exquisite work from a writer whose reach is galactic.”—Oprah Daily Booker Prize winner George Saunders returns with his first collection of short stories since the New York Times bestseller *Tenth of December*. ONE OF THE BEST BOOKS OF THE YEAR: *The New Yorker* The “best short-story writer in English” (*Time*) is back with a masterful collection that explores ideas of power, ethics, and justice and cuts to the very heart of what it means to live in community with our fellow humans. With his trademark prose—wickedly funny, unsentimental, and exquisitely tuned—Saunders continues to challenge and surprise: Here is a collection of prismatic, resonant stories that encompass joy and despair, oppression and revolution, bizarre fantasy and brutal reality. “Love Letter” is a tender missive from grandfather to grandson, in the midst of a dystopian political situation in the (not too distant, all too believable) future, that reminds us of our obligations to our ideals, ourselves, and one another. “Ghoul” is set in a Hell-themed section of an underground amusement park in Colorado and follows the exploits of a lonely, morally complex character named Brian, who comes to question everything he takes for granted about his reality. In “Mother’s Day,” two women who loved the same man come to an existential reckoning in the middle of a hailstorm. In “Elliott Spencer,” our eighty-nine-year-old protagonist finds himself brainwashed, his memory “scraped”—a victim of a scheme in which poor,

vulnerable people are reprogrammed and deployed as political protesters. And “My House”—in a mere seven pages—comes to terms with the haunting nature of unfulfilled dreams and the inevitability of decay. Together, these nine subversive, profound, and essential stories coalesce into a case for viewing the world with the same generosity and clear-eyed attention Saunders does, even in the most absurd of circumstances.

A Book of Days Jun 26 2019 A deeply moving and brilliantly idiosyncratic visual book of days by the National Book Award-winning author of *Just Kids* and *M Train*. More than 365 images chart Smith's singular aesthetic - inspired by her wildly popular Instagram In 2018, without any plan or agenda for what might happen next, Patti Smith posted her first Instagram photo: her hand with the simple message “Hello Everybody!” Known for shooting with her beloved Land Camera 250, Smith started posting images from her phone including portraits of her kids, her radiator, her boots, and her Abyssinian cat, Cairo. Followers felt an immediate affinity with these miniature windows into Smith's world, photographs of her daily coffee, the books she's reading, the graves of beloved heroes - William Blake, Dylan Thomas, Sylvia Plath, Simone Weil, Albert Camus. Over time, a coherent story of a life devoted to art took shape, and more than a million followers responded to Smith's unique aesthetic in images that chart her passions, devotions, obsessions, and whims. Original to this book are vintage photographs: anniversary pearls, a mother's keychain, and a husband's Mosrite guitar. Here, too, are

never-before-seen photos of life on and off the road, train stations, obscure cafés, a notebook always nearby. In wide-ranging yet intimate daily notations, Smith shares dispatches from her travels around the world. With 365 photographs, taking you through a single year, *A Book of Days* is a new way to experience the expansive mind of the visionary poet, writer, and performer. Hopeful, elegiac, playful - and complete with an introduction by Smith that explores her documentary process - *A Book of Days* is a timeless offering for deeply uncertain times, an inspirational map of an artist's life.

The Lost Meaning of the Seventh Day Apr 16 2021 In *The Lost Meaning of the Seventh*

Day, Sigve K. Tonstad recovers the profound and foundational understanding of God that can be experienced in the seventh day. He shows that Scripture has consistently asserted that the Sabbath of Creation is the Sabbath of the whole story of how God makes right what has gone wrong in the world. Tonstad argues that the seventh day is the symbol of God's faithfulness precisely when God's presence seems to be in doubt. He demonstrates how God, through the seventh day, seeks the benefit of all creation. Inevitably, this leads to an investigation of how this universal symbol became obscured. This sweeping work of biblical theology and historical analysis traces the seventh day as it is woven throughout Scripture and the history of Christianity. Its twenty-seven chapters consider, among other things, the relationship of the seventh day to freedom, to social conscience, to the "greatest commandment," and to the enigmatic "rest that remains." Tonstad engages the move away from the seventh day in early Christian history, the mindset in medieval Christianity, and the sobering long-term implications leading all the way to the Holocaust and the ecological crises in our time. *The Lost Meaning of the Seventh Day* will engage, illuminate, provoke, and ultimately inspire readers who enjoy a serious work presented in a style that is "luminous" and a "delight to read."

Countdown to Zero Day Jul 28 2019 Top cybersecurity journalist Kim Zetter tells the story behind the virus that sabotaged Iran's nuclear efforts and shows how its existence has ushered in a new age of warfare—one in which a digital attack can have the same destructive capability as a megaton bomb. In January 2010, inspectors with the International Atomic Energy Agency noticed that centrifuges at an Iranian uranium enrichment plant were failing at an unprecedented rate. The cause was a complete mystery—apparently as much to the technicians replacing the centrifuges as to the inspectors observing them. Then, five months later, a seemingly unrelated event occurred: A computer security firm in Belarus was called in to troubleshoot some

computers in Iran that were crashing and rebooting repeatedly. At first, the firm's programmers believed the malicious code on the machines was a simple, routine piece of malware. But as they and other experts around the world investigated, they discovered a mysterious virus of unparalleled complexity. They had, they soon learned, stumbled upon the world's first digital weapon. For Stuxnet, as it came to be known, was unlike any other virus or worm built before: Rather than simply hijacking targeted computers or stealing information from them, it escaped the digital realm to wreak actual, physical destruction on a nuclear facility. In these pages, Wired journalist Kim Zetter draws on her extensive sources and expertise to tell the story behind Stuxnet's planning, execution, and discovery, covering its genesis in the corridors of Bush's White House and its unleashing on systems in Iran—and telling the spectacular, unlikely tale of the security geeks who managed to unravel a sabotage campaign years in the making. But *Countdown to Zero Day* ranges far beyond Stuxnet itself. Here, Zetter shows us how digital warfare developed in the US. She takes us inside today's flourishing zero-day "grey markets," in which intelligence agencies and militaries pay huge sums for the malicious code they need to carry out infiltrations and attacks. She reveals just how vulnerable many of our own critical systems are to Stuxnet-like strikes, from nation-state adversaries and anonymous hackers alike—and shows us just what might happen should our infrastructure be targeted by such an attack. Propelled by Zetter's unique knowledge and access, and filled with eye-opening explanations of the

technologies involved, Countdown to Zero Day is a comprehensive and prescient portrait of a world at the edge of a new kind of war.
