Routledge Handbook of Internet Politics Apr 16 2021 The politics of the internet has entered the social science mainstream. From debates about its impact on parties and election campaigns following momentous presidential contests in the United States, to concerns over international security, privacy and surveillance in the post-9/11, post-7/7 environment; from the rise of blogging as a threat to the traditional model of journalism, to controversies at the international level over how and if the internet should be governed by an entity such as the United Nations; from the new repertoires of collective action open to citizens, to the massive programs of public management reform taking place in the name of e-government, internet politics and policy are continually in the headlines. The Routledge Handbook of Internet Politics is a collection of over thirty chapters dealing with the most significant scholarly debates in this rapidly growing field of study. Organized in four broad sections: Institutions, Behavior, Identities, and Law and Policy, the Handbook summarizes and criticizes contemporary debates while pointing out new departures. A comprehensive set of resources, it provides linkages to established theories of media and politics, political communication, governance, deliberative democracy and social movements, all within an interdisciplinary context. The contributors form a strong international cast of established and junior scholars. This is the first publication of its kind in this field; a helpful companion to students and scholars of politics, international relations, communication studies and sociology.

Imagined Communities Feb 12 2021 Benedict Anderson's 1983 masterpiece *Imagined Communities* is a ground-breaking analysis of the origins and meanings of "nations" and "nationalism". A book that helped reshape the field of nationalism studies, *Imagined Communities* also shows the critical thinking skills of interpretation and analysis working at their highest levels. One crucial aspect of Anderson's work involves the apparently simple act of defining precisely what we mean when we say 'nation' or 'nationalism' - an interpretative step that is vital to the analysis he proceeds to carry out. For Anderson, it is clear that nations are not 'natural,' as historians and anthropologists are well aware, nations as we understand them are a relatively modern phenomenon, dating back only as far as around 1500. But if this is the case, how can we agree what a 'nation' is? Anderson's proposed definition is that they are "imagined communities" - comprising groups of people who regard themselves as belonging to the same community, even if they have never met, and have nothing in common otherwise. The analysis that follows from this insight is all about examining and breaking down the historical processes that helped foster these communities - above all the birth of printing, and the development of capitalism. Brilliantly incisive, Anderson's analysis shows how good interpretative skills can form the foundations for compelling and original insight.

Logics of War Jun 30 2022 The modern ethics of war is a field of disparate, competing voices based on often unexplored theological and metaphysical assumptions. Therese Feiler approaches them from the borderline area between systematics, philosophical theology and religious studies. With reference to G. W. F. Hegel's and like-minded thinkers' 'theo-logic' that negotiates Christ's mediation and immanent dialectics, Feiler identifies the logic and problem of mediation as the

core concern of political ethics. Feiler unites five representative authors from now disparate strands of contemporary just war ethics, testing whether they offer a meaningful possibility of mediation and subsequent reconciliation: a sovereign realist and a cosmopolitan idealist; a rationalist individualist, an idealist Christian ethicist, and finally, an evangelical theologian. Opening the just war debate for comparative critical engagement, Feiler creates a fascinating study that locates a "dynamic point" at which faithful, free political action can be wrestled from irony, tragedy, and melancholic inertia in the face of totalitarian suffocation.

Thinking After Europe Aug 21 2021 A comprehensive exposition and analysis of Jan Patočka's political philosophy, in particular his idea of Europe and concept of 'post-Europe', and its continuing relevance to philosophy and contemporary politics.

The Scarlet Woman and the Red Hand Apr 04 2020 This book provides a comprehensive description of how evangelicals in Northern Ireland interpreted the "Troubles" (1966-2007) in the light of how they read the Bible. The rich and diverse landscape of Northern Irish evangelicalism during the "Troubles" is ideally suited to this study of both the light and dark sides of apocalyptic eschatology. Searle demonstrates how the notion of apocalypse shaped evangelical and fundamentalist interpretations of the turbulent events that characterized this dark yet fascinating period in the history of Northern Ireland. The book uses this case study to offer a timely reflection on some of the most pressing issues in contemporary negotiations between culture and religion. Given the current resurgence of religious fundamentalism in the wake of 9/11, together with popular conceptions of a "clash of civilizations" and the so-called War on Terror, this book is not only an engaging academic study; it also resonates with some of the defining cultural issues of our time.

Battlestar Galactica Jul 20 2021 "The West Wing" or "Generation Kill" in Space? A show about God-fearing sex-obsessed robots? Or a complex meditation on fate, dreaming and eternal recurrence? Of all recent television science fiction series, the reimagined "Battlestar Galactica" is the most highly praised and consistently inventive and intelligent. Where the original show was a straightforward space opera, the new one is rich, strange and above all unpredictable. This book covers the new "Battlestar Galactica" from beginning to end, covering all of the show's principal themes from the depiction of sexuality in an era of artificial people and downloaded memories to what it means to be a member of a military organization when the stakes are not victory or defeat but survival. Like all the best shows about the future or the past - we are never sure when all this is supposed to be happening - "Battlestar Galactica" is a series about the present; chapters here cover its depiction of the post-9.11 world and such issues as abortion and worker's rights. This definitive book on the full new "Battlestar Galactica" also includes an interview with Jane Espenson, co-executive producer of the show's last seasons and writer/director of the "Battlestar Galactica" prequel film "The Plan", with a complete episode guide.

Is the East Still Red? Jan 02 2020 Does China represent a non-capitalist alternative to neoliberal development models? Commentators on the left have offered sharply divergent assessments over the last two

decades. A few still cling the old dream of market socialism, twinning efficiency with social justice. For most, however, China is proof that market reforms invariably yield dispossession, inequality, and capitalist restoration. Is the East Still Red? argues that both interpretations are wrong and exhibit a common failure to distinguish between market mechanisms and capitalist imperatives. Gary Blank situates the Chinese experience within broader Marxist debates on socio-historical transitions and primitive accumulation, highlighting the need to conceptualize capitalism as a unique system in which producers and appropriators depend on the market for their reproduction. Despite years of marketization, the mandarins in Beijing have not yet imposed full market dependence in industry and agriculture. He shows how the resistance of workers and peasants, the imperatives of party-state legitimacy, and the reproductive strategies of individual Communist officials and managers all act to perpetuate central aspects of a bureaucratic-collectivist system, in which direct producers and bureaucrats are effectively merged with the means of production. The People's Republic may be a non-capitalist market alternative, albeit one that is hardly edifying for socialists.

Contesting Islam, Constructing Race and Sexuality Sep 02 2022 The current political standoffs of the 'War on Terror' illustrate that the interaction within and between the so-called Western and Middle Eastern civilizations is constantly in flux. A recurring theme however is how Islam and Muslims signify the 'Enemy' in the Western socio-cultural imagination and have become the 'Other' against which the West identifies itself. In a unique and insightful blend of critical race, feminist and post-colonial theory, Sunera Thobani examines how Islam is foundational to the formation of Western identity at critical points in its history, including the Crusades, the Reconquista and the colonial period. More specifically, she explores how masculinity and femininity are formed at such pivotal junctures and what role feminism has played in the wars against 'radical' Islam. Exposing these symbiotic relationships, Thobani explores how the return of 'religion' is reworking the racial, gender and sexual politics by which Western society defines itself, and more specifically, defines itself against Islam. *Contesting Islam, Constructing Race and Sexuality* unpacks conventional as well as unconventional orthodoxies to open up new spaces in how we think about sexual and racial identity in the West and the crucial role that Islam has had and continues to have in its development.

Peace, Culture, and Violence Mar 04 2020 *Peace, Culture, and Violence* is a collection of essays that examine the forms of violence that permeate everyday life and explore sources of non-violence by considering topics such as thug culture, language, hegemony, police violence, war, terrorism, gender, and anti-Semitism.

Portable Prose Jul 08 2020 *Portable Prose: The Novel and the Everyday* explores issues related to objecthood, the everyday, and portability within the novel. The scope of this wide-ranging collection includes nineteenth- and twentieth-century fiction, contemporary postmodern literature and science fiction, as well as broader theories of the novel and the nature of reading.

The Geopolitics of Europe's Identity May 06 2020 This book pursues an original perspective on Europe's shifting extent and geopolitical standing: how countries and spaces marginal to it impact on Europe as a center. A theoretical discussion of borders and margins is developed, and set against nine studies of countries, regions, and identities seen as marginal to Europe.

Releasing the Commons Sep 09 2020 This book moves beyond seeing the commons in the past tense, an entity passed over from the public into the private, to reimagine the commons as a process, a contest of force, a reconstitution, and a site of convening practices. It highlights new spaces of gathering opening up, such as the digital commons, and new practices of being in common, such as community economies and solidarity networks. The commons is seen as a contested domain of the collective and as a changing way of being in common, with the balance poised in the tensile play between political economy and social innovation. The book focuses on the possibility of recovering a future in which more can be held by the many, focusing on three concepts: nation and nature as a commons, publics and rights, and bodies, concerning the management of lives and livelihoods. Across these three passage points, the book finds evidence of a commons under attack but also defended in fragile though promising ways. With contributions from leading scholars, this thought provoking book will be of great interest to students and scholars in geography, environmental studies, politics, anthropology, and cultural studies.

Contours of Descent Aug 01 2022 The concepts of modernity and modernism are among the most controversial and vigorously debated in

contemporary philosophy and cultural theory. In this new, muscular intervention, Pollin explores these notions in a fresh and illuminating manner.

ISpy Apr 28 2022 A chilling account of the tradeoff we are willing to make between interactive media technologies and the power of others to watch over--and control--us. This brave new world of electronic marketing and consumption actually lulls consumers into blissful ignorance of how that usage can be--and is being--monitored.

Iran, the Green Movement and the USA Oct 30 2019 Iran, the Green Movement and the USA presents the paradox that the USA faces in dealing with Iran over its nuclear armament: negotiate, and legitimize Ahmadinejad's otherwise troubled presidency; resort to sanctions or military strikes, and altogether destroy the budding civil rights campaign of the Green Movement. Either way, as leading Iranian scholar Hamid Dabashi argues, the Islamic Republic will become even stronger. Featuring a short history of how the USA and Iran came to be in this confrontation, this elegantly written book provides the reader with a dynamic picture of the regional geopolitics and a purposeful guide to how to understand and deal with it.

Social Movements in India Jun 18 2021 Social movements have played a vital role in Indian politics since well before the inception of India as a new nation in 1947. During the Nehruvian era, from Independence to Nehru's death in 1964, poverty alleviation was a foundational standard against which policy proposals and political claims were measured; at this time, movement activism was directly accountable to this state discourse. However, the role of social movements in India has shifted during the last several decades to accompany a changed political focus—from state to market and from reigning ideologies of secularism to credos of religious nationalism. In the first volume to focus on poverty and class in its analysis of social movements, a group of leading India scholars shows how social movements have had to change because poverty reduction no longer serves its earlier role as a political template. Nonetheless, particular sectors of social movement politics remain the holding vessels for India's egalitarian conscience. With distinctive chapters on gender, lower castes, environment, the Hindu Right, Kerala, labor, farmers, and biotechnology, *Social Movements in India* will be attractive to students and researchers in many different disciplines.

Sociopolitical Aesthetics Dec 25 2021 Since the turn of the millennium, protests, meetings, schoolrooms, reading groups and many other social forms have been proposed as artworks or, more ambiguously, as interventions that are somewhere between art and politics. This book surveys the resurgence of politicized art, tracing key currents of theory and practice, and mapping them against the dominant experience of the last decade: crisis. Drawing upon leading artists and theorists within this field - including Hito Steyerl, Marina Vishmidt, Art & Language, Gregory Sholette, John Roberts and Dave Beech - this book argues for a new interpretation of the relationship between socially-engaged art and neoliberalism. Kim Charnley explores the possibility that neoliberalism has destabilized the art system so that it is no longer able to absorb and neutralize dissent. As a result, the relationship between aesthetics and politics is experienced with fresh urgency and militancy.

Hinglaj Devi May 30 2022 About two hundred kilometers west of the city of Karachi, in the desert of Baluchistan, Pakistan, sits the shrine of the Hindu Goddess Hinglaj. Despite the temple's ancient Hindu and Muslim history, an annual festival at Hinglaj has only been established within the last three decades, in part because of the construction of the Makran Coastal Highway, which connects the distant rural shrine with urban Pakistan. Now, an increasingly confident minority Hindu community has claimed Hinglaj as their main religious center, a site for undisturbed religious performance and expression. In *Hinglaj Devi*, Jürgen

Schaflechner studies literary sources in Hindi, Sanskrit, Sindhi, and Urdu alongside extensive ethnographical research at the shrine, examining the political and cultural influences at work at the temple and tracking the remote desert shrine's rapid ascent to its current status as the most influential Hindu pilgrimage site in Pakistan. Schaflechner introduces the unique character of this place of pilgrimage and shows its modern importance not only for Hindus, but also for Muslims and Sindhi nationalists. Ultimately, this is an investigation of the Pakistani Hindu community's beliefs and practices at their largest place of worship in the Islamic Republic today--a topic of increasing importance to Pakistan's contemporary society.

Shakespeare's Extremes Dec 13 2020 Shakespeare's Extremes is a controversial intervention in current critical debates on the status of the human in Shakespeare's work. By focusing on three flagrant cases of human exorbitance - Edgar, Caliban and Julius Caesar - this book seeks to limn out the domain of the human proper in Shakespeare.

José 'Pepe' Mujica Mar 16 2021 Toward the end of his administration (2010-2015), then Uruguayan President Jose 'Pepe' Mujica made headlines across the world with a couple of unusual speeches at United Nations assemblies in Rio de Janeiro and New York that were heatedly anti-capitalist, anti-consumerist, anti-globalisation and anti-climate change all fuelled by a libertarian socialist concept of freedom. This Sancho Panza-like figure was not only one of the few presidents of developing countries not to have somehow got personally rich while in government, but was known to live modestly as a practicing farmer and gave away two-thirds of his salary to his left-wing political organisation and to social housing projects. Even more bizarre was the fact that he had become president of the country whose government he had tried to overthrow forty years earlier in a revolutionary guerrilla war, an exploit for which he spent over a decade in military jails after being shot, severely wounded and tortured. This book is an introduction to the politics and philosophy of an unrepentant permanent militant whose evolution took him from defeated guerrilla warrior to successful presidential candidate without inconsistencies or betrayals, whatever his adversaries from right and left may claim. The study sets Mujica not only in his Uruguayan and Latin American context but also within an International Left that is coming out of mourning for the loss of so-called existing socialism as they search for solutions to lessen the damage done by rampant neoliberal economics and to find creative alternatives. Stephen Gregory's polemic is essential reading for all those interested in discovering Uruguay's unique position in a Latin America where the political right is in decline and leftist governments are moving to the middle ground.

Rethinking Democracy Feb 24 2022 For years, intellectuals have argued that, with the triumph of capitalist, liberal democracy, the Western World has reached "the end of history." Recently, however, there has been a rise of authoritarian politics in many countries. Concepts of post-democracy, anti-politics, and the like are gaining currency in theoretical and political debate. Now that capitalist democracies are facing seismic and systemic challenges, it becomes increasingly important to investigate not only the inherent antagonism between liberalism and the democratic process, but also socialism. Is socialism an enemy of democracy? Could socialism develop, expand, even enhance democracy? While this volume seeks a reappraisal of existing liberal democracy today, its main goal is to help lay the foundation for new visions and practices in developing a real socialist democracy. Amid the contradictions of neoliberal capitalism today, the responsibility to sort out the relationship between socialism and democracy has never been greater. No revival of socialist politics in the twenty-first century can occur without founding new democratic institutions and practices.

Crises of Imagination, Crises of Power Jul 28 2019 Today, when it seems like everything has been privatized, when austerity is too often seen as an economic or political problem that can be solved through better policy, and when the idea of moral values has been commandeered by the right, how can we re-imagine the forces used as weapons against community, solidarity, ecology and life itself? In this stirring call to arms, Max Haiven argues that capitalism has colonized how we all imagine and express what is valuable. Looking at the decline of the public sphere, the corporatization of education, the privatization of creativity, and the power of finance capital in opposition to the power of the imagination and the growth of contemporary social movements, Haiven provides a powerful argument for creating an anti-capitalist commons. Capitalism is not in crisis, it is the crisis, and moving beyond it is the only key to survival. Crucial reading for all those questioning the imposition of austerity and hoping for a fairer future beyond it.

Naming Violence Sep 29 2019 Much is at stake when we choose a word for a form of violence: whether a conflict is labeled civil war or genocide, whether we refer to "enhanced interrogation techniques" or to "torture," whether a person is called a "terrorist" or a "patriot." Do these decisions reflect the rigorous application of commonly accepted criteria, or are they determined by power structures and partisanship? How is the language we use for violence entangled with the fight against it? In Naming Violence, Mathias Thaler articulates a novel perspective on the study of violence that demonstrates why the imagination matters for political theory. His analysis of the politics of naming charts a middle ground between moralism and realism, arguing that political theory ought to question whether our existing vocabulary enables us to properly identify, understand, and respond to violence. He explores how narrative art, thought experiments, and historical events can challenge and enlarge our existing ways of thinking about violence. Through storytelling, hypothetical situations, and genealogies, the imagination can help us see when definitions of violence need to be revisited by shedding new light on prevalent norms and uncovering the contingent history of ostensibly self-evident beliefs. Naming Violence demonstrates the importance of political theory to debates about violence across a number of different disciplines from film studies to history.

Infrapolitical Passages Oct 11 2020 This book makes a case for infrapolitics as an enactment of intellectual responsibility in the face of a tumultuous world of war and of technological value extraction on a planetary scale. Infrapolitical Passages proposes to clear a way through some of the dominant political determinations and violent symptoms of contemporary globalization. In doing so, Gareth Williams makes a case for infrapolitics as an enactment of intellectual responsibility in the face of a tumultuous world of war and of technological value extraction on a planetary scale. The book offers a theory of globalization as a gigantic, directionless crisis in humanity's symbolic organization, as well as a theory of global economic warfare as the very positing of directionlessness and, at the same time, facticity. Williams's infrapolitics stands at a distance from the biopolitical, which it understands as domination presenting itself as the production of specific forms of subjectivity in the face of the commodity. The subsequent obscuring of being signals the need to circumvent the instrumentalization of life as subordination to the metaphysics of subjectivity, representation, and politics. Infrapolitical Passages works to confront that which is unavailable in subjectivity and representation, opening a way for facticity in the age of globalization in order to make room for the infrapolitical question for existence.

Walter Scott and Contemporary Theory Jan 26 2022 A bestselling author in his own time and long after, Sir Walter Scott was not only a writer of thrilling tales of romance and adventure but also an insightful historical thinker and literary craftsman. Over the last two decades, scholars have come to see him as an important figure in Romantic-period literature, Scottish literature and the development of the historical novel. Walter Scott and Contemporary Theory builds on this renewed appreciation of Scott's importance by viewing his most significant novels - from Waverley and Rob Roy to Ivanhoe, Redgauntlet, and beyond - through the lens of contemporary critical theory. By juxtaposing pairings of Scott's early and later novels with major contemporary theoretical concepts and the work of such thinkers as Alain Badiou, Judith Butler, Jacques Derrida and Slavoj Žižek, this book uses theory to illuminate the complexities of Scott's fictions, while simultaneously using Scott's fictions to explain and explore the state of contemporary theory.

Authorship's Wake Nov 04 2022 Authorship's Wake examines the aftermath of the 1960s critique of the author, epitomized by Roland Barthes's essay, "The Death of the Author." This critique has given rise to a body of writing that confounds generic distinctions separating the literary and the theoretical. Its archive consists of texts by writers who either directly participated in this critique, as Barthes did, or whose intellectual formation took place in its immediate aftermath. These writers include some who are known primarily as theorists (Judith Butler), others known primarily as novelists (Zadie Smith, David Foster Wallace), and yet others whose texts are difficult to categorize (the autofiction of Chris Kraus, Sheila Heti, and Ben Lerner; the autotheory of Maggie Nelson). These writers share not only a central motivating question - how to move beyond the critique of the author-subject - but also a way of answering it: by writing texts that merge theoretical concerns with literary discourse. Authorship's Wake traces the responses their work offers in relation to four themes: communication, intention, agency, and labor.

Michel Meyer's Problematology Feb 01 2020 In today's society,

everything is in question. The reflexive questioning of modernity has fundamentally problematized society, including philosophy, which has experienced a crisis of metaphysics. Michel Meyer's problematology answers this crisis by questioning questioning, unfolding a new way of doing philosophy, with special relevance for the study of society. In this first-ever extended treatment of Meyer's work, Nick Turnbull examines the main features of problematology, including the principle of questioning and the deduction of an original conception of difference, based on the question-answer relationship. Turnbull shows how these concepts produce new perspectives in the philosophy of the emotions, history, meaning, politics, rhetoric and science. He applies Meyer's ideas to key questions in the philosophy of social science, showing how problematology offers important insights for understanding contemporary society. The book compares problematology with the work of well-known thinkers, including Bourdieu, Castoriadis, Collingwood, Derrida, Dewey, Gadamer, Heidegger and Lyotard. Turnbull uses problematology and rhetoric to explain how meaning is constructed through practice in the negotiation of social distance.

Theory in the "Post" Era Sep 21 2021 Theory in the "Post" Era brings together the work and perspectives of a group of Romanian theorists who discuss the morphings of contemporary theory in what the editors call the "post" era. Since the Cold War's end and especially in the third millennium, theorists have been exploring the aftermath - and sometimes just the "after" - of whole paradigms, the crisis or "passing" of anthropocentrism, the twilight of an entire ontological and cultural "condition," as well as the corresponding rise of an antagonist model, of an "anti," "meta," or "neo" alternative, with examples ranging from "posthumanism" and "post-postmodernism" to "post-aesthetics," "postanalog" interpretation or "digicriticism," "post-presentism," "post-memory," "post-" or "neo-critique," and so forth. It is no coincidence, the contributors to this volume argue, that this "post" moment is also a time when theory is practiced as a world genre. If theory has always been a "worlded" enterprise, a quintessentially communal, cross-cultural and international project, this is truer at present than ever. Perhaps more than other humanist constituencies, today's theorists work and belong in a theory commons that is transnational if still uneven economically, politically, and otherwise. Theory in the "Post" Era reports the results of Romanian theory experiments that join efforts made in other places to foster a theory for the "post" age.

The Kurdish National Movement in Turkey Aug 09 2020 This book provides an interpretive and critical analysis of Kurdish identity, nationalism and national movement in Turkey since the 1960s. By raising issues and questions relating to Kurdish political identity and highlighting the ideological specificity, diversity and the transformation of Kurdish nationalism, it develops a new empirical dimension to the study of the Kurds in Turkey. Cengiz Gunes applies an innovative theoretical approach to the analysis of an impressively large volume of primary sources and data drawn from books and magazines published by Kurdish activists, political parties and groups. The analysis focuses on the specific demands articulated by the Kurdish national movement and looks at Kurdish nationalism at a specific level by disaggregating the nationalist discourse, showing variations over time and across different Kurdish nationalist organisations. Situating contemporary Kurdish political identity and its political manifestations within a historical framework, the author examines the historical and structural conditions that gave rise to it and influenced its evolution since the 1960s. The analysis also encompasses an account of the organisational growth and evolution of the Kurdish national movement, including the political parties and groups that were active in the period. Bringing the study of the organisational development and growth of the Kurdish National Movement in Turkey up to date, this book will be an important reference for students and scholars of Middle Eastern politics, social movements, nationalism and conflict.

Modernism Between Benjamin and Goethe May 18 2021 Widely regarded as one of the foremost cultural critics of the last century, Walter Benjamin's relation to Modernism has largely been understood in the context of his reception of the aesthetic theories of Early German Romanticism and his associated interest in avant-garde Surrealism. But this Romantic understanding only gives half the picture. Running through Benjamin's thought is also a critique of Romanticism, developed in conjunction with a positive engagement with the philosophical, artistic and historical writings of J. W. von Goethe. In demonstrating the significance of these Goethean elements, this book challenges the dominant understanding of Benjamin's philosophy as essentially Romantic and instead proposes that Goethe's Classicism, conceived as

the counterpoint to Romanticism, permits a corrective to the latter's deficiencies. Benjamin's Modernist concept of criticism, it is argued, is constituted in the movement between these polarities of Romanticism and Classicism. Conversely, placing Goethe's Classicism in relation to Benjamin's practice of literary criticism reveals historical tensions with Romanticism that constitute the untimely - indeed, it will be argued, cinematic - Modernism of his work. Adopting a transcritical approach, this book alternates between Benjamin and Goethe in relation to the experiences of colour, language and technology, assembling a constellation of philosophical and artistic figures between them, including the writings of Kant, Nietzsche, Cohen, Deleuze, Koselleck, Klages, and the work of Grünewald, Marées, Klee, Turner, Hulme, Eisenstein, Tretyakov, and Murnau.

Transforming Memories in Contemporary Women's Rewriting Jun 26 2019 Including topics as diverse as feminism and its relationship to the marketplace, plagiarism and copyright, silence and forgetting, and myth in a digital age, this book explores the role of rewriting within feminist literature from the 1970s onwards in relation to the theme of cultural memory.

Critical Companion to Contemporary Marxism Oct 23 2021 International and interdisciplinary in range and scope, the Critical Companion to Contemporary Marxism provides a thorough and precise panorama of recent developments in Marxist theory in the US, Europe and beyond.

Theory in Social and Cultural Anthropology Jan 14 2021 Social and cultural anthropology and archaeology are rich subjects with deep connections in the social and physical sciences. Over the past 150 years, the subject matter and different theoretical perspectives have expanded so greatly that no single individual can command all of it. Consequently, both advanced students and professionals may be confronted with theoretical positions and names of theorists with whom they are only partially familiar, if they have heard of them at all. Students, in particular, are likely to turn to the web to find quick background information on theorists and theories. However, most web-based information is inaccurate and/or lacks depth. Students and professionals need a source to provide a quick overview of a particular theory and theorist with just the basics—the "who, what, where, how, and why," if you will. In response, SAGE Reference plans to publish the two-volume Theory in Social and Cultural Anthropology: An Encyclopedia. Features & Benefits: Two volumes containing approximately 335 signed entries provide users with the most authoritative and thorough reference resource available on anthropology theory, both in terms of breadth and depth of coverage. To ease navigation between and among related entries, a Reader's Guide groups entries thematically and each entry is followed by Cross-References. In the electronic version, the Reader's Guide combines with the Cross-References and a detailed Index to provide robust search-and-browse capabilities. An appendix with a Chronology of Anthropology Theory allows students to easily chart directions and trends in thought and theory from early times to the present. Suggestions for Further Reading at the end of each entry and a Master Bibliography at the end guide readers to sources for more detailed research and discussion.

Reading the Canon Nov 11 2020 'Reading the Canon' explores the relation between the production of literary value and the problem of periodization, tracing how literary tastes, particular reader communities, and sites of literary learning shape the organization of literature in historical perspective. Rather than suggesting a political critique of the canon, this book shows that the production of literary relevance and its tacit hierarchies of value are necessary consequences of how reading and writing are organized as social practices within different fields of literary activity. 'Reading the Canon' offers a comprehensive theoretical account of the conundrums still defining contemporary debates about literary value; the book also features a series of historically-inflected author studies—from classics, such as Shakespeare and Thomas Pynchon, to less likely figures, such as John Neal and Owen Johnson—that illustrate how the idea of literary relevance has been appropriated throughout history and across a variety of national and transnational literary institutions.

Security, Technology and Global Politics Aug 28 2019 This book analyses some of the key problems explored in Paul Virilio's theorising on war and security. Paul Virilio has developed a provocative series of writings on how modern societies have shaped the acceleration of military/security technologies - and how technologies of security and acceleration have transformed society, economy and politics. His examination of the connections between geopolitics, war, speed, technology and control are viewed as some of the most challenging and disturbing interventions on

the politics of security in the twenty-first century, interventions that help us understand a world that confronts problems that increasingly emerge from the desire to make life safer, faster, networked and more efficient. Security, Technology and Global Politics examines some of the key concepts and concerns in Virilio's writings on security, society and technology: endo-colonization, fear and the war on terror; cities and panic; cinema and war; ecological security and integral accidents; universities and ideas of progress. Critics often point to an apocalyptic or fatalistic element to Virilio's writings on global politics, but this book challenges this apocalyptic reading of Virilio's work, suggesting that - while he doesn't provide us with easy solutions to the problems we face - the political force in Virilio's work comes from the questions he leaves us with about speed, security and global politics in times of crisis, terror and fear. This book will be of interest to students of critical security studies, political theory, sociology, political geography, cultural studies and IR in general.

Landmarks Revisited Jun 06 2020 The Vekhi (Landmarks) symposium (1909) is one of the most famous publications in Russian intellectual and political history. Its fame rests on the critique it offers of the phenomenon of the Russian intelligentsia in the period of crisis that led to the 1917 Russian Revolution. It was published as a polemical response to the revolution of 1905, the failed outcome of which was deemed by all the Vekhi contributors to exemplify and illuminate fatal philosophical, political, and psychological flaws in the revolutionary intelligentsia that had sought it. Landmarks Revisited offers a new and comprehensive

assessment of the symposium and its legacy from a variety of disciplinary perspectives by leading scholars in their fields. It will be of compelling interest to all students of Russian history, politics, and culture, and the impact of these on the wider world.

Making Constituencies Dec 01 2019 Public division is not new; in fact, it is the lifeblood of politics, and political representatives have constructed divisions throughout history to mobilize constituencies. Since the turn of the twenty-first century, the idea of a divided United States has become commonplace. In the wake of the 2020 election, some commentators warned that the American public was the most divided it has been since the Civil War. Political scientists, political theorists, and public intellectuals have suggested that uninformed, misinformed, and disinformed voters are at the root of this division. Some are simply unwilling to accept facts or science, which makes them easy targets for elite manipulation. It also creates a grass-roots political culture that discourages cross-partisan collaboration in Washington. Yet, manipulation of voters is not as grave a threat to democracy in America as many scholars and pundits make it out to be. The greater threat comes from a picture that partisans use to rally their supporters: that of an America sorted into opposing camps so deeply rooted that they cannot be shaken loose and remade. Making Constituencies proposes a new theory of representation as mobilization to argue that divisions like these are not inherent in society, but created, and political representatives of all kinds forge and deploy them to cultivate constituencies.

Utopian Literature and Science Oct 03 2022 Scientific progress is usually seen as a precondition of modern utopias, but science and utopia are frequently at odds. Ranging from Galileo's observations with the telescope to current ideas of the post-human and the human-animal boundary, this study brings a fresh perspective to the paradoxes of utopian thinking since Plato.
