The Visual Made Verbal Jun 30 2022 Verbal descriptions of life have been around for centuries, but the digital age has made access to those descriptions even more important. Dr. Joel Snyder, an audio description pioneer, has created a book and website offering the first overview of the field, including its history, application to a range of genres, description of training techniques, and list of resources. Audio description brings the visual world to life, making theater productions, television shows, films, visual art and events accessible to people who are blind or have low vision. Describers employ succinct, vivid, imaginative words to convey visual images those with sight take for granted. Although countries worldwide have taken up the cause, the United States has fallen short on research and institutions to study the field. Dr. Snyder's book helps fill in some of

those gaps. “For decades, Joel Snyder has combined his astonishing command of language with his keen attention to detail to create word pictures that stir the mind’s eye, especially for patrons of the arts whose physical eyes cannot see. [...] His book has been long-awaited, and no doubt will become the standard for prospective audio describers around the world.” -Kelsey Marshall, Founding Director of Accessibility, The John F. Kennedy Center for the Performing Arts, Washington, DC Dr. Joel Snyder is known internationally as one of the world’s first “audio describers,” a pioneer in the field of audio description, making theater events, museum exhibitions, and media accessible to people who are blind or have low vision. Since 1981, he has introduced audio description techniques in 36 states and D.C. and in 35 countries. He holds a PhD in accessibility audio description from the Universitat Autònoma de Barcelona. Dr. Snyder’s company, Audio Description Associates, LLC (www.audiodescribe.com) uses audio description to enhance a wide range of arts projects including video and film, museum exhibitions, and live events. As Director of Described Media for the National Captioning Institute, he supervised the production of descriptions for Sesame Street and dozens of feature films and nationally broadcast television; his descriptions can be heard at Smithsonian Institution exhibits, the Getty Museum, the Albright-Knox Gallery, and throughout the country at National Park Service visitor centers. As Director of the American Council of the Blind’s Audio Description Project (www.acb.org/adp), Dr. Snyder voiced description for network coverage of President Obama’s inauguration in 2009 and 2013, and recently produced the first-ever audio-described tour of The White House. The ADP website is the nation’s principal provider of information and resources on audio description.

The SGML Implementation Guide Oct 03 2022

Foreword---------- SGML is misunderstood and underestimated. I have always wanted to write this book. I am pleased that two people with whom I have had the pleasure to work were finally able to do so. Since I have always been a bit of an evangelist, I feel pride when my "students" become recognized "teachers". In the early years of SGML we struggled to define a language that would bring the information to its rightful place. We succeeded. Then we had to explain these idea to technical adoptors. Again, I think we have succeeded. We have learned much about SGML in the process of implementing it. These experiences must now also be shared, along with comprehensible information on the lan guage itself. The word must move out of the lab and the computer center and reach the business people, the users, the movers and shakers. The next generation will do things with SGML that we can't even imagine yet- it is that versatile.

Modernism in the Green Jan 26 2022 Modernism in the Green traces a trans-Atlantic modernist fascination with the creation, use, and representation of the modern green. From the verdant public commons in the heart of cities to the lookout points on mountains in national parks, planned green spaces serve as felicitous stages for the performance of modernism. In its focus on designed and public green zones,Modernism in the Green offers a new perspective on modernism's overlapping investments in the arts, politics, urbanism, race, class, gender, and the nature-culture divide. This

collection of essays is the first to explore the prominent and diverse ways greens materialize in modern literature and culture, along with the manner in which modernists represented them. This volume presents the idea of "the green" as a point of exploration, as our contributors analyze social-organic spaces ranging from public parks to roadways and refuse piles. Like the term "green," one that evokes both more-than-human natural zones and crafted public meeting places, these chapters uncover the social and spatial intersection of nature and culture in the very architecture of parks, gardens, buildings, highways, and dumps. This book argues that such greens facilitate modernists' exploration of how nature can manifest in an era of increasing urbanization and mechanization and what identities and communities the green now enables or prevents.
