THE NURSE MANAGER'S SURVIVAL GUIDE, 4TH EDITION Dec 31 2019 Nurses are already nurse managers. They must manage patient caseloads and care plans as well as supervise aides, technicians, and other care providers. But moving from this type of organic management to a defined nurse manager role is not a natural progression. Nurse managers must command a vast, diverse, and robust skill set, and those skills must first be defined, explained, and operationalized for success. In an environment that offers new managers little support, where do they turn? The Nurse Manager's Survival Guide (4th Ed.) provides an overview of a nurse manager's major roles and responsibilities—all the

fundamentals needed for success in one easy-to-use, consolidated, practical reference. From tips on building the right team to budgeting basics, time-management tools, and advice on taking care of one's self (and their team), author Tina Marrelli supplies the resources nurse managers need to excel in day-to-day operations.

The College Administrator's Survival Guide Jan 24 2022 The book that every dean and department chair needs to survive—and thrive—in the twenty-first-century university. First released in 2006, *The College Administrator's Survival Guide* has served as the bible for a generation of provosts, deans, department chairs, and program directors. Shrewd administrators have returned to the guide time and again for C. K. Gunsalus's advice on handling complaints, negotiating disagreements, and dealing with difficult personalities. Now, in this revised and updated edition, *Gunsalus* guides rookie administrators and seasoned veterans through today's most pressing higher-education challenges. These days academic leaders must respond to heightened demands for transparency and openness. These demands are intensified by social media, which increases the visibility of university conflicts and can foster widespread misinformation about campus affairs. Meanwhile, institutions have become flatter, with administrators expected to work more closely with faculty, students, and a range of professionals even as support staffs shrink. Between the ever-replenishing inbox, the integration of often-exasperating management systems into every dimension of academic life, and the new demands of remote learning, deans and department heads are juggling more balls than ever before. Tightening budgets have already forced administrators into more difficult choices and, in the wake of COVID-19, there will be no relief from financial constraints. From #MeToo to partisan battles over curricula and funding, college and university leaders need more savvy and greater sensitivity than ever. What hasn't changed are the challenges of dealing with difficult people and the importance of creating and maintaining environments in which faculty, staff, and students have the support they need to do their best work. *The College Administrator's Survival Guide* provides the tools to keep cool and get the job done.
